## MOND VOCTOBER 20 1986 Five US staff are expelled by Russians

#### From Christopher Walker, Moscow

niously ordered the removal taristic plans" of five American diplomats and the American government immediately announced its intention of taking unspecified retaliation.

Coming exacty a week after the breakdown of the Reykjavik summit over the conten-tious issue of "Star Wars", the new diplomatic row is threatening to sour further the mood between the superpowers and to hinder efforts to return relations between them to a more harmonious pitch.

And all the boot in Pale The mutual suspicion was reinforced later last night and the next le when Tass, the official Soviet news agency, issued a bitter, four-page denunciation of the public attitude towards the Reykjavik meeting adopted by Mr Caspar Weinberger, the US Secretary of Defence and the Assistant Secretary, Mr

Richard Perle. Under the headline "Sordid manoeuvres", the article by a leading news analyst, Mr Yuri Kornilov, accused both men of trying to mislead the world about what had taken place in

the will made to be Iceland and concluded: "The and watch in part Pentagon hawks' faise 'prep-1 2 mg 1 000 aredness' to settle the question in frunt fe ." ... Der in in feel Inside i... Comastups at the but has pre-the firsted news

## NEWS SUMMARY

## Tories may hear 'spanking' tapes

Conservative conneillors at Basildon, Essex, will decide this week whether to listen to tapes which accuse Mr Har-vey Proctor, MP for Billericay, of engaging in spanking sessions with young men.

Four senior members of Billericay Conservative Association resigned last Friday after Mr Proctor received a vote of confidence at a storusy meeting during which he was questioned about the allegations.

If the Basildon councillors listen to the tapes, they will then decide whether to take action against the MP. One of the councillors, Mr George Dighton, said last night: "I totally support the four people who resigned. We believe that Mr Proctor is not doing enough to clear his name."

Mr Proctor, a bachelor, has described the allegations as a "tissue of lies" but has said that he will not sue over the accusations because of the costs involved and because it would involve people having to give testimony and that would embarrass them.

## Checks at CID seek 'Dave' Windsor

Security measures at Windsor Castle are to be reviewed by Scotland Yard after the arrest eight days ago of an intruder (Tim Jones writes).

## Asian visa rush ends

Immigration afficers will decide this week nu the fate of the last 200 people held when they flew into Heathrow Airport earlier this month in an attempt to beat the Government's new visa restrictions.

The people, mainly single males from India, Pakistan and Sri Lanka, who were described as "tricky cases", were moved at the weekend to the Harmondsworth immigrant detention centre, Middlessex, and to youth custody centres in Wiltshire and Kent.

The Home Office said the detainees would be processed this week. To satisfy visa entry requirements, they must prove they have come to Britain as visitors.

## Veteran **MP** dies

Mr Simon Mahon, the former Labour MP, died at his home yesterday, aged 72. He represented Bootle, Liverpool, for 24 years. Mr Mahon was elected in 1955 and remained as the MP until 1979, when his successor, Mr Allan

Roberts, took over. His wife, Veromica, said yesterday that her hus-

#### BA pilots' Racing shares trophy is move fails returned

#### **By Harvey Elliott** Air Correspondent

Plans by British Airwavs pilots to buy up to 25 per cent of the airline's shares when it hours after she had reported it stolen (Howard Foster writes). is privatized next year have heen squashed by the The 10in high cup, valued conservatively at £5,000, was wnn by Dawn Run, one of the management

The pilots wanted the Gov-ernment to allow them to huy up to £6,000 of shares each in the airline under a special deal arranged through their union, Balpa, and the Trustee Savings Bank. That would have given them up to 25 per cent of the shares.

But the airline management is determined that all its staff must be treated equally, from baggage handlers to Concorde captains, and will resist any such plans.

Details of the privatization are to be announced in London tomorrow when it is expected that all employees will be offered about £100 of free shares and the right to huy the same number again at a discount

Britain's three main scheduled airlines are engaged in a big new battle for the highly competitive non-stop flight market from London to the - Ear East.

The record-breaking 12-hour 25-minute inaugural British Airways 747 "City of Edinburgh" flight to Hong Kong at the weekend has brought British Airways into the battle with British Caledohian and Cathay Pacific.

CLD RUEDESHEIM-ON-THE-RHINE The Asbach Story

It could easily be argued that Ruedesheim is the gateway to that most beautiful part of the River Rhine with its vineyards and castles.

What is beyond dispute is that it is the home of that most sought after German Brandy - Asbach Uralt. For it was here, around the turn of the century that Hugo Car Asbach founded his world famous distillery:

It takes five litres of the finest wines to produce Relistant El mit one single bottle of Asbach Uralt. What it also takes is the family skill in distilling: the maturing in Limousin oak barrels; and of course the blending, handed down through generations, to create this soft, mellow, golden brandy. The after dinner brandy that isn't just for after dinner.

Discover it in discerning restaurants and offlicences, or come and see us here in Ruedeshcim from Monday to mid-day Friday for a tasting.

For further information write to: Weinbrennerei, Asbach & Co. 6220 Ruedesheim am Rhein, Postfach 1150, West Germany,

## BBC costs 'could have exceeded £1m

with 50 per cent employed as partnerships, although more 12 per cent were salaried than ever before are breaking partners. But as the majority only

according to a survey pub-lished this week. Women account for 40per cent of all entrants yet the majority are amploined to a survey pub-the past six years, it is too early to say that discrimina-tion is the reason for the The survey, published in

the Law Society Gazette, coincides with new statistics. described the treod as while women are still con-disturbing". The results dis-close that 31 per cent are the oumber of pariners is from the society showing that

The increase was 50 per cent in the year up to 1985, and the latest total is 1,400 compared with 20.600 men. But the statistics also show a

dramatic increase in women assistant solicitors: in 1984/85 the proportion was one in three compared with one in four the year before.

One explanation is that more women are returning to work. The increase in women with practising certificates exceeds that for those admitted onto the roll. "This is highly suggestive of women returning to private practice or at least seeking to do so," the society

says. It appears that many women have not become partners because they have taken time off to have children and returned to their careers at a later stage.

Solicitors and barristers rel about monopoly rights, But the survey dispels the myth that women stay away for long periods to have children, and that they are with each party fighting for its own material interests". He also gave a warning of the lowering of professional standards which might come from protection for one forced to specialize in fields such as family law or conveyancing.

from proceeding too far with advertising. Solicitors would effectively be led into taking For those who take maternity leave rather than a longer clients from each other, and break in their careers, the becoming no different from "market traders". He arged solicitors to call a average time off is 5.24 months, and 2.43 months for those who are partners. Most halt to further advertising, whatever the pressures under the "guise of competition and what is said to be consumer returned to the same job but only half to the same bours.

## Sugar 'no danger to health or weight'

An official United States report which claims that sugar does not make people fat or damage their health is being studied by Government health leaders.

The report, the most com prehensive over undertaken, was carried out by a medical taskforce set up by the US Food and Drug Administration (FDA).

The taskforce found that while sugar does contribute to tooth decay, "there is no conclusive evidence that it is a concustre evapare and it is a hazard to the general public". Dr Allan Forbes, of the FDA in Washington, said: "We can now state categori-cally that there is no evidence at all to link sugar with obesity, diabetes, high blood pressure, hyperactivity or beart disease".

The Government is ex-pected to announce soon the members of its own committee of inquiry into sugar, part of the Committee on the Medical Aspects of Health (Coma). A Come report published in

1982 said it saw no reason to reduce sugar consumption in Britain. However a report by the unofficial National Advisory Committee on Nu-tritional Education, published a year carlier, said consump-

tion should be reduced. Annual United Kingdom super consumption is about 801b per person.

Mr Charles Lange, chairman of the Segar Bureau, which represents sugar manufacturers, said: "The report confirms what we have known for a very long time, that sugar is safe and does not cause any diseases, other than contribut-ing to dental decay along with

other carbohydrates." Mrs Edwina Currie, Under Scretary of State for Health and Social Secarity, said: "What we have always said is that there is no such thing as one particular bad food. It is how much you eat of it."

## MPs launch campaign for 10% increase in housing body funds

## By Michael Dyn

A nationwide campaign that "if we do not save our seeking to increase the level of older housing, many areas will government spending on the reach the point where the voluntary housing movement expensive alternative of will be launched from the House of Commons today by senior politicians from the Conservative, Labour and

The first of a

The campaign, led by Mr John Cunningham, the Oppositing environment spokes-man, is calling for a 10 per cent increase in the Government's budget for housing associations in 1987-88, to enable them to tackle chronic housing problems more effectively.

Accompanying the cam-paign is the publication of a report by the National Federatioo of Housing Associations, the central representative and negotiating body for all housing associations, entitled Housing: a countrywide problem.

The report provides detailed evidence of increasing homelessness, overcrowding and serious disrepair throughout England aod Wales, and the need to stimulate the private rented sector as called for by The Times io the Home Front campaign.

Department of the Environment aod the Housing Corporation to concentrate funding for housing associ-ations in 80 key regions such 1978. as Liverpool. Birmingham, Leeds and London, designated as "stress areas", where the combined effect of urban

deprivation, ucemployment and racial tension is greatest. As a result of that decision,

83 per cent of government funding for housing associations now goes to stress areas, while the rest of the country is left with 17 per cent of the total budget, a decline of 10 per cent over previous years.

The report argues that in-creased funding for stress areas at the expense of the rest of the country fails to acknowledge that in many parts of England and Wales not so designated "housing cooditioos are equally appalling".

The campaign will be con-ducted simultaneously from London and eight "non-stress areas" with chrooic housing problems, such as Oxford, Durham and Norfolk.

will also attempt to highlight the consequences of the 30 per cent reduction in funding from the Housing Corporation since 1977, and the 75 per cent reduction in local authority finance for housing associations since

According to Mr Richard Best, director of the National Federation of Housing Associ-ations, the combined decline in Housing Corporation and local authority funding has meant that approvals for new schemes are down from schemes are down from 61,400 io 1977-78 to 19,700 m 1986-87.

## Single pension expected to rise by 80p a week

By Jill Sherman 2.1 per cent rise in pensions and other social security benefits, to take effect from next April, is expected to be announced shortly.

The rise will increase the basic state pensioo for a single person by about 80p, from the present £38.70 a week. It will reflect the 2.1 per cent rise in the retail price iodex from January to September, an-oounced last Friday, and comes after an interim 1.1 per cent increase last July. Pensions for married cou-

ples will rise by at least £1.30, from the present £61.95, having risen by 65p to July.

The two-stage increase is the result of a change from November to April in the timing of the anonal benefit uprating, as part of the oew social security reforms.

The Government is legally bound to raise pensions and some other benefits in line with the retail price index. But this year, because of the twostage increase, pensioners will get marginaly more than the 3 per cent annual rise in prices. Supplementary beoefit rates, calculated on a slightly different basis, are expected to rise by 60p from £29.80 for a single person, and by 95p to £49.35 for a coople.

Pensioners' organizations have condemned the projected rises as inadequate and say they fail to reflect the 10.5

per cent rise in earnings. But a spokesman for the Department of Health and Social Security said yesterday that the rises always reflected the rate of inflation. Cold weather pay

## **Cut-backs crisis** for private groups

In contrast to our European neighbours, housing associations account for a mere 2.5

Nevertheless, more thao one millioo people in England and Wales live io about 550,000 homes, all of which have been reclaimed from dereliction or built from scratch by more than 2,000 housing associations.

That laudable achievement stands as a testimony to the efficacy of private initiative and the judicious application of public finance.

Today, however, housing associations are facing crisis. Not only are they unable to satisfy the growing demand for their services from the young, unemployed, single, disabled and elderly, but they also face the prospect of sustaining huge reversals in their housing programmes because of successive annual

declines in lunding. In 1982-83 loans from the

housing associatioo homes has never been more urgent. per cent of Britaio's homes (Michael Dynes writes). As housing starts in the pri-vate and public sector have vate and public sector have fallen below levels attaioed in the 1970s, and while an es-timated 25 per cent of Britaio's housing stock is in need of "substantial repairs" there is a desperate need for more iovestment in housing. In spite of the overwhelm-

Ironically, the oeed for

ing popularity of the presect government's right-to-buy legislation, there is a consensus across the political spectrum that Britain oeeds more homes for rent, particularly for those sectors of the population for whom neither owneroccupied nor council housing can provide the answer. -

The decline of the private rented sector has left an accommodation vacuum which housing associations are ideally suited to fill.

During the past 10 years they have accumulated coosiderable expertise io

# **OUR GROWTH RATE IS WORTH RABBITING ON ABOUT.**

1980 450,000 POLICIES

1986 **1 MILLION POLICIES** 

Housing Corporation, the main source of finance for housing associations. excceded £927 million. By 1986-87 that figure had fallen to £660 million.

The decline in local authority loans has been equally severe, from £456 million in 1977-78 to £111 million io 1986-87, more than 75 per cent in 10 years.

As Mr Richard Best, director of the National Federation of Housing Associations. is at pains to point out, "because so much money goes to projects already being huilt, the cuts have been made oo future building and rehabilitation programmes."

Consequently, the number of new homes that can be provided by housing associations has shrunk drastically. Since 1982-83 they have had to reduce their programmes by 30 per cent in real terms, which has meant a decline from 40,000 to 20.000 new housing projects each year.

building, buying and rehabilitating derelict properties, and are eager to expand their work into older urban areas.

lo Britaio today there are at least 110,000 properties standing idle for want of repair. Local authorities estimate that there are more than one million families oo their waiting lists. and about 175.000 additional families present themselves to local authorities as homeless every year.

In those circumstances, economies io housing finance are ephemeral. What the Department of the Environment manages to save oo its anoual budget for housing associations, the Department of Health and Social Science has to pick up in increased

housing benefits. Unlike spending on housing association rehabilitatioo programmmes, the cost of putting up homeless familes in hotels and guest houses leaves little to show for it.

## Putting a price on lord of the manor

## By Christopher Warman, Property Correspondent

For people who cannot an-ford to buy the manor house of has a ruined castle and m-their choice, the title of Lord of the Manor comes more cheaply, and a forthcoming interest to American buyers. The Lordship of Hingham in Narfolk was once owned by

2

lordships. The sale of lordships has become big business in recent years, with rare and historic titles fetching more than £30,000. Most are no more than a set of documents which cannot be exported and have to remain in safekeeping.

International interest is keen nevertheless, and the sale in London on November 11 is expected to yield some high prices, particularly for five manors in the Irish Republic, which are believed to be the first Irish titles to be offered for many years. They belong to Lord Gormanston, head of the ancient Anglo-Irish family of Preston that originated in Lancashire in the thirteenth

century. The five on offer are the Baroay of Kells in Co Kilkenny, graoted to Earl Strongbow by Henry II in 1169, Herbardeston, Baiscadden and Ballymadon in Co Dublin, and Maydon-hayes in Co Menth. They include one of the oldest documents in the sale, dating back to 1173. Interest in these is expected to come from the United Kingdom and the United States, Canada and the Centia

The other titles come from England and Wales, and the highest price is likely for the

For people who cannot af- Lordship of Snodhill, which

Norfolk was once owned by King Athelstan (921-941), but is more notable as the original home of the family of Abra-ham Lincoln, who emigrated to New England early in the enth century. SEVEN

The Lordship of Kerdiston, also in Norfolk, has connections with the poet Geoffrey Chaucer, and gives the owner the right to hold a market. It has records showing the continuous descent of lords from 1100.

Prices for the titles will start at £6,000, and the owners are entitled to call themselves lord or lady of the manor, apply for a coat of arms, and have their title inserted in their passports, stationery, cutlery and

Lordships of the manor date back to Saxon times, and the system survived until the 1920s when the tenancies granted by lords of the manor were made into freeholds in the hands of the tenants.

At the same time the lord of the manor, who held his title direct from the Crown, was deprived of most of his ancient rights and privileges, which ranged from the right to extract minerals to droit de seigneur, under which the lord had the right to appropriate any village maiden in his lordship on her welding night.

> Tickets taking nearly 20 million people to destinations all around the world. In fact, on an average day, 575 of our

flights take off somewhere on the globe. (That's one flight every three minutes – about the time it takes to read this advertisement.)

If that surprises you, you are probably unaware that since 1973, British Airways has consistently flown more people internationally than any other airline.

**BRITISH AIRWAYS** 

Britain's highest flying company.

ISSUED BY HILL SAMUEL & COLUMITED ON BEHALF OF HIM GOVERNMENT AND LACKED BROTHERS & COLUMITED ON

We also have the largest fleet of any European airline, with 159 aircraft in operation. But the most important fact of all is that we have now become one of the most profitable international airlines in the world.

Which all goes to prove that British Airways is no fly-by-night company.

## Students set to discuss boycott of lecturer who wrote for The Times

#### By Howard Foster

are meeting this week to discuss the case of Mr David Selbourne, the Ruskin College ecturer who for the last six months has been boycotted for writing an article for The

Mr Scibourne is taking the trade union-affiliated institution to court because it refuses to give him a written commitment to academie freedom over his treatment by fellow lecturers and students after he wrote the article.

Such is the concern about issues raised by the Selbourne affair that Mr George Walden, the minister for higher education, has written to the college seeking an explanation for its actions. Ruskin's academic advisers, who are drawn from the Oxford colleges, are also to hold a meeting to decide their approach to the situation. What has come under the

closest scrutiny is Ruskin's standing as an academic body and its relationship with the trade unions which form its executive council.

Mr Selbourne's troubles started at the beginning of last summer term when students began boycotting his lectures because they claimed he had "scabbed" by contributing an article on the Militant tendency in Liverpool in The Times on March 26, the last day of the previous term.

Since June be has sought and has been denied a specific commitment to academic freedom and although most teaching staff at Ruskin had expected a gradual subsidence of feeling on the matter, Mr Selbourne now finds himself having to relinquish his post at a college where he has taught for 20 years. Because the matter is in the hands of lawyers, official comment at advisers. Although confined

certainly no sbortage of pri-vate expression of concern. has been following the Selbourne debate closely and Although the Selbonrne affair is only now the subject of a debate at the Oxford Univer-sity Students' Union on

Wednesday, this is not, according to the motion's sponsors, a reflectioo of intellectual apathy among the

The new term is still young and many people just have not heard of the Selbourne case," Mr Andrew Adonis, a Jesus

• People are asking

CO

whether Mr Selbourne's rights to express himself how and where he likes are being protected 9

College lecturer and proposer of a condemnatory motion at the students' union, said.

Mr Adonis went on: "As time goes on, the issue becomes more widely-discussed. What people are asking is whether Mr Selbourne's rights to express himself how and where he likes are being protected. It is a vital issue.

Ruskin may not officially be part of the university but it uses the facilities and is a valid cause for concern." The university's Hebdom-

adal Council has already met and discussed the Selbourne case. Although its members met in private, there is no secret that fears were expressed about the cherished ideals of the freedom of the academic to write where he likes.

Professor AH Halsey, of Nuffield College, sits on the Hebdomadal Council and is also one of Ruskin's academic

Oxford University students Ruskin is scarce but there is to bed at present with flu he will meet his fellow advisers to discuss how the Ruskin authorities are handling the affair very soon. Professor Halsey said: "I am

unhappy about the situation. I believe it is the first time that such an issue has come up at Ruskin The educational advisers

will meet and our concern will be to advise Ruskin as to what it should do." One of the chief student

instigators of action against Mr Selbourne was Mr John Austin. Ironically, Mr Selbourne taught him and even gave Mr Austio a reference to enable him to start his studies in politics, philosophy and economics at St Peter's this term.

Mr Austin accused Mr Selbourne of "scabbiog" by writing the article io The Times and helped to organize the boycott which left the lecturer with empty rooms during the summer term. Mr Austin said:"Selbourne offended people's sensibilities

by writing in The Times. Academic freedom is an important issue but so is the

feeling of people who come to Ruskin with strong trade union convictions and who take it very personally when one of the lecturers writes in a newspaper which is the sub-ject of trade union action." Mr Austin called on Mr

Selbourne to "repent or resign". In fact, Mr Selbourne has left the college claiming that it has repudiated his contract by making conditions for his teaching intolerable. The controversy has raised

questions of the academic standing of Ruskin College.

Ruskin College, Oxford (top), Mr Andrew Adonis (above left) and Mr David Selbourne, the Ruskin lecturer at the centre of an argument over academic freedom.

Asbestos waste site standards criticized By Angella Johnson.

A waste disposal company has been criticized for "imperfections" in its management of an asbestos waste dump in Hertfordshire.

A report calls for improvements in health and safety at the toxic waste site run by Cleanaway (UK) at

Broxbournebury Park Quarry. Cock Lane, Hoddesdon. These are necessary, the re-port states, if the company is to continue dumping asbestos waste at the pit. The 11 recon

include tighter security to stop children climbing into the quarry and playing on the asbestos waste; soaking the waste and the tipping area with water before the waste is discharged; regular inspec-tions by council officials; a thorough cleaning of lorries before they leave the site; improved supervision of the operation and a comprehen-

sive monitoring system. Hertfordshire County Conncil commissioned the £4,500 report in September after a public protest against the dumping of 100,000 tonnes of asbestos-cootamioated building rubble near a special school and a large housing state

The report, by Dr John Cook, an independent consul-tant scientist at Harwell Laboratories in Oxfordshire, said thatthe site was no danger to public health if the improvenents were made.

The report will be considered at a special council planning meeting on October

Cleanaway, of Brentwood Essex, has voluntarily stopped the movement of asbestos waste to the site until the planning committe makes its decision. So far about 35,000 tonnes of the waste have been buried at the dump.

## **Roads opened up** to competition in radical reform

A week from nowthe Transport Act 1985 will come into effect, and competition is intended to sweep through lo-cal bus services. But will it? Rodney Cowton, Transport Correspondent, considers the prospects

Britain's local hus services, outside London, on which accounted for about 70 pe cent of all existing routes. The over four hillion passenger remainder of the routes are the ourneys are made each year, subsidized ones. next Sunday begin their most All summer prospective op erators have been bidding for

radical shake-up for 50 years. It is hoped that it will reverse the trend which has seen the hus share of lotal travel fall from 39 per cent to 8 per cent over the past 30 years. Until now there has been virtually no competition on hus routes because any change of route or challenge to an existing operator had to be specifically approved, usually

against the opposition of the operator. In practice applications were generally rejected. But from October 26 competitioo is to be encouraged.

and after a three-month initial period any hus-owner who can meet safety requirements will be able to operate on any route he chooses. That is the date on which

the hus-regulation provisions of the 1985 Traffic Act take effect. These are designed to improve services to travellers and to reduce the £500 millioo subsidies which are paid on unprofitable services.

Local hus services are divided into two groups, those that are profitable and those that are subsidized.

As part of a process of phasing in competition, those who wanted to operate profitable routes from next Sunday had to register their plans by the end of last February, and 1,500 operators, including about 200 new ones, did so. The Department of Transport estimates that those plans

eight months which of the profitable, or registered routes they would be working, but decision-taking on the sub-sidized routes has been continuing right up to the last Although in Glasgow, where operators jumped the gun by starting their services some

weeks ago, there have been queues of competiog buses on central roads, the general impression in the industry is that in most places the impact of competition initially will not be dramatic.

subsidies for operating particular routes, with the local authorities, who will pay

## Editor 'wrong' to give in to pressure

Mr Donald Treiford, editor his duty was to bring the paper of The Observer, was wrong to out give in to a demand by print workers not to publish a book ever, believed that decision review by Mr Bernard Levin, was wrong. It reiterated its the Press Council said yesterday.

it upheid a complaint by Mr. Ronald Spark, of The Rotyngs, Rottingdean, Brighton, that it was improper of the editor of The Observer to suppress the review.

The Press Council, how view that the freedom of the press depended essentially on

the right of an editor to exercise an unfettered and independent discretion about what he should or should not publish

It believed that when an dowca io

Print workers at I're Oo server had refused to produce the newspaper if the editor tried to print the review by Mr Levin of a biography of Augustus Hare, a Victorian eccentric.

They objected to bis review because Mr Levin also worked for The Times with which their union, the National Graphical Association, was in dispute.

Mr Trelford said there was no question in his mind or the management's that the ma-chine room chapel could be persuaded to drop its ban on Mr Levin. That was the weekend of bitter clashes on the picket line at Wapping. where The Times was printed. The editor understood the

print workers' position. He knew, too, as he told the Press Council, that because his own newspaper would shortly announce its own new printing arrangements good relations with its printers were particutarly necessary at that time. The loss of revenue if The Observer failed to appear that

week would be more than £700.000.

The Press Council in its adjudication said it was land employee, of Grosvenor understandahle that Mr Road, St Albans, Hertford-Trelford should decide that shire,.

threats from any source, he weakened the position of any editor of any newspaper who might face such a threat.

The Press Council understood the problem an editor faced at a critical time when his choice was between removing matter which in his judgement should appear in his paper or risking that his paper would not appear at all It believed, however, that the priociple of press freedom required an editor in those circumstances not to yield to the demand to remove matter from his paper despite the consequent cost, and that he

should be supported by his TICLOF. The complaint against The Observer was upbeld.

It was not unreas or improper for two columnists of The Sunday Telegraph to describe the Westland helicopter company as "insignificant" and "pint-sized" in the cootext of the political issue they were discussing, the Press Council said.

It rejected a complaint by Mr L Harris, a former West-

## **Reforms to ease court** reporting are sought

## By Frances Gibb, Legal Affairs Correspondent

ask the Home Office to take death cannot be identified. action over court practices which are restricting free reporting of trials.

At a meeting with Mr David Mellor, Minister of State at the Home Office, tomorrow, the Guild of British Newspaper Editors will table a "shopping list" of reforms. in particular they want ac-

• Courts withholding the dentities of dead children; Coroners holding inquests athout notifying the press: • Crown courts failing to release the addresses of defendants: and

· Judges not giving guidance

on identifying rapists. The guild is particularly icon to stop what it sees as the increasing misuse of the Children and Young Persons Act 1933 to protect the identity of children.

The provisions of the Act give courts a discretionary power to make orders banning publication of details which may identify a child.

But in the absence of any midance from the Home Of ice or Lord Chancellor's Department, conris are imposing orders with the ef-

Newspaper editors are to cases of child battering or even The guild maintains that a number of these orders are not

valid according to legal advice it has obtained, and in a number of cases newspapers have persuaded magistrates to rescind the orders made.

The editors also want the Home Office to insist that venues and times of coroners' inquests be given to the press in advance.

Editors also want action over some crown courts which fail to release the addresses of defendants. As a result some cases are not reported because insufficient identifying detail is available.

Finally, editors are concerned about identifying rapists. Where the defendant is victim's husband, should the he be named but the relationship obscured; or should he continue to have the privilege of anonymity?

They want the Home Office to include guidelines in its forthcoming Criminal Justice Bill that might prevent one newspaper from acting dif ferently from another. The Government has already promised to remove defendants' anonymity in rape cases in that Bill

Old Location, which the Go ernment wants to demolish and then redevelop as a whites-only suburb.

More than a year aod a half ago, the Government announced that all forced removals were to be stopped, and the fate of the Old Location is seen as the first

serious test of the sincerity of that pledge. "It was a good meeting. The spirit of the people is very high. I believe we are going to try to explore every avenue to stay here," said Mr Marshall Buys, a member of the "action committee" co-ordinating resistance to the removal, who added that their first actioo would be a "stayaway" from work in Brits on Wednesday. "The whole of Brits industry will be dead," he said confidently.

Another member of the committee, Mr Simon Sepeng, There is no drainage, no who used to work at the Alfa electricity, no tarred roads and Romeo car factory in Brits no street lighting. There are

the border of the nominally "independent" Bophuthatswana tribal homeland. One reason for not wanting to go there is the fear that it could eventually be incorporated into Bophuthatswana and that its inhabitants would then lose their Sooth African

citizenship. The Minister of Constitu-tional Development and Plan-ning, Mr Chris Heunis, contends that the Old Location is a slum and needs to be demolished for reasons of hygiene. It would be too expensive, he maintains, 10 upgrade the housing and facilities to an acceptable standard. The Old Locatioo is certainly a rough place. largely because of deliberate government oeglect. No house of bricks and mortar has been built there since the 1930s.

in which gaily-painted lorry tyres serve as seats.

Visible on a rocky hill overlooking the Old Location is what many consider the real reason for the Government's wish to remove them: the next houses and well-watered gurdens of Elandsrand, n well-10do white suburb of Brits.

"It is better that they should go," an Afrikaans-speaking resident of Elandsrand said yesterday, waving a hand in the direction of the blacks settlement. Did the blacks cause trouble ? "Not real trouble," be conceded. "But at weekends there are drinking parties and a lot of noise."

The Brits constituency has become marginal for the Government and io the next general election could fall to the extreme right-wing Conservative Party of Dr Andries Treurnicht, which wants apartheid rigidly enforced.

## Shell threatens to withdraw

## From Ray Kennedy, Johannesburg

Disiovestment moves by leading multinational compa-nies operating in South Africa appeared to be intensifying nt the weekend after n warning by Royal Dutch Shell, the biggest foreign oil company in South Africa, that it would

pull out unless the Government speeds up race reforms. Shell's chief executive in South Africa, Mr John Wilson, said there were no im-mediate plans for withdrawal, but the company was coming under tremendous pressure to do so.

He said: "If the bottom line of Royal Dutch Shell is adversely affected internationally the shareholders will have to reconsider their position." Shell's warning was frootpage news in South African newspapers yesterday, but was not reported by the state-cootrolled South African Broadcasting Corporation. The Jobannesburg Sanday

Times, under a banner head-line "Shell shock", said: "Any move by Shell to run down its operations would be a heavy psychological blow to South Africa."

Arnez. It was reported that General Motors, which employs 3,000 people at its plant in Port Elizabeth, is on the verge of selling off its South African operation to individuals, which will mean that its products will be sold under another guise. Another American company, Warner Brothers Re-cord Corporation, was also

said to be close to selling its South African interests to its Johannesburg-based associate, WEA Records. It has a 30 per cent share of the local

market and 60 per cent of its staff is black. Shell employs 2,500 people directly in South Africa - half of them black - and thousands more indirectly in hundreds of Shell service stations.

Its annual sales are cotimated at 2.3 billion rands (£737 million), generating profits of about 100 million rands

Mega

over a

It also has oil refining, marketing and coal and chemical interests, as well as a 50 per cent interest - with British Petroleum - in a 10 million tous a year refinery in Durban.

Ever since the Oper countries imposed a ban on sales to South Africa in the mid-1970s, Shell has been accused by in-ternational lobbies of openly floating the embarge.

The controversy over its deals with South Africa came to a peak in 1979 when a Liberian-owned tanker, the Salem, under contract to Shell. secretly unloaded a cargo of all at Durban before being scut-tied in the South Atlantic.

## **Corruption allegations** as Australia's 'deep north' election begins

The electoral campaign for control of Queensland, the Australian "deep north" state, started in carnest yesterday with allegations of corruption against the government of Sir Joh Bjelke-Petersen.

Su Joh, the flamboyant and durable state premier, will be seeking a new mandate on November 1 after 18 years of arch-conservative rule. It had been apparent that a whill of scandal which has

attached to his National Party administration in recent months was likely to make this bis toughest campaign yet. That was confirmed when the Labor opposition launched its campaign in Brisbane

yesterday. Mr Neville Warburton, the Labor leader, called for "a new broom to sweep away the ac-cumulated dirt, to clean away the cobwebs of corruption that now envelop this government". National Party admin-istration had been guilty of greed, cronyism and nepot-ism, he said. The major prowth industries in Qucens-land had been the drugs trade, tax avoidance, bankruptcies

Along with clean government, what is liable now to become an acrimnnious campaign is going to focus on the

massive land redistribution

Land invasions, some instigated by Shining Path, have already taken place. President García has prom-ised the redistribution of 1.85

million acres to 400 peasant communities, affecting 43 farm co-operatives. The orig-inal land reform legislastion, dating back to 1969, merely passed ownership from large landlords to former workers without adequately incor-

porating the communities. But the local hierarchs of Schor Garcia's party. Apra, are dragging their feet because they are closely associated with co-operatives' managements and former owners.

The latest increase in Since Señor Garcia took subversive violence control office in mid-1985 their opera-just a few weeks before municipal elections to be beld to be beld to be beld on November 9. Shining Path is violently opposed to elec-

The Bedford Team Astra van range gives the driver in you what you want, while the businessman in you gets what is needed.

TPS 1

The clear appeal of this shows with the runaway sales success of the Astra van range.

This popularity is shared by other Bedford vans. The combined registrations of Astra, Midi, Rascal and CF2 have gained Bedford the biggest sales increase in 1986 of any manufacturer.\*

Team Astra vans are the most modern, aerodynamically-styled on the street. Their good looks alone speak volumes about your business.

But apart from being streetsmart they're street-credible.

The 'Good Van Guide' wrote in a comparative van test report, "By far the best (engine) though just has to be Astramax. Its engine is silky, pushing forwards smoothly and effortlessly'

'Commercial Motor', in their van comparison test, also noted how a

\*Source: SMMT registration data. Light commercial vehicles up to 3.5 tonnes; Jan 10 Sept 1986 v 1985.

laden Astra diesel beat similarly laden Ford Escort and Peugeot 305GL diesel vans, by returning 48.19 mpg.

In a similar test

BEDFORD

BEDFÓRD

ASTRA VAN

a laden, petrolengined Astramax gave 36.25 mpg overall; the best of the bunch. One reason for such good fuel efficiency is the crossflow cylinder head design.

Loadspace	Astra Van	Astramax
Height (max)	341/2"	42"
Width (max)	53½″	63″
Length (max)	70″	68"

'Good Van Guide' also had good words about driving the Astramax "... very quiet, very refined, very civilised. You can almost forget you're driving a van". They added, "Astramax must become new light vans leader

with its blend of style, driveability and useful room".

Now to get down to carrying capacity, at the business end you have a choice of load volumes:  $66 \cdot 3 \, \text{cu}$  ft in the Astra, or  $82 \, \text{cu}$  ft in the Astramax.

Uniformly distributed payloads are 415 kg for the Astra Van with 365 kg or 560 kg, depending on

the model, for the Astramax.

Note, too, that unlike some vans a solid bulkhead is fitted as standard. so is a rear wash/ wipe on Astra L

models. This is now also available for Astramax vans.

Another clever touch, unique to Astramax, is the load extension deck in place of the passenger seat.

To sum up, Bedford's Team Astra vans lead because they're built to eat 7 up roads as well as loads.

## Southern Indian politics

## Help for disadvantaged classes may cause irreparable damage

A political nightmare for two South Indian chief ministers is created by the policy of positive discrimination in favour of economically or socially backward classes, which is supposed to help social integration and remove in-

causing riots and political disturbances, and may even-ually damage the social fabric of the states beyond repair.

The policy calls for places to be reserved for applicants from specified castes or other groups in higher education or

in government employment. It has been a cardinal principle of Indian social policy since the founding of the republic, and is seen as a useful tool in overcoming the prejudices of previous centuries.

Lately, hower, it has be-come a way for politically powerful groups to buttress their own privileged positions, encouraged by vote-hungry politicians.

This reservation policy enahled an ambitious Congress politician such as Mr Amarsioh Solanki to put together an alliance of low-caste, outcaste and Muslim voters which gained him victory in state elections and carried him 10 the chief minister's chair. But he was thrown out of

from 25 per cent.

From Michael Hamlyn Delhi power as a result of the more castes were aghast: an import-advanced castes starting a ant protest began to roll, led mighty agitation against his policies. The demonstrations by a student agitation. But before much steam could be genbecame increasingly violent erated, the Andhra High Court and turned into a series of riots and running battles be-tween Muslims and Hindus In the southern state of struck down the decision as unconstitutional, citing a Supreme Court decision that

reservations should never be Andhra Pradesh, Mr N. T. more than 50 per cent of avail-Rama Rao, the idiosyncratic, ageing film star who occupies the chief minister's chair, able places. Mr Rama Rao agreed with the students not to appeal against the High Court decision, if they agreed to call off their protests. But this deal enraged the leaders of the backward classes, who began a series of

the chief minister's chair, having created his own politi-cal party and swept Congress from power early in 1983, ap-parently learned no lesson from Mr Solanki's experience. In July this year, feeling threatened by a Congress move to unite the backward classes against him, he hastily increased reservations in jobs and college admissions. riots of their own, burning rather more than £2 million worth of buses in the course of and college admissions.

In the neighbouring state of Karnataka, Mr Ramakrishna Hegde, the chief minister from After his move the number of places available to open competition fell to a ludicrous the Janata party, has been fac-29 per cent. The others are ed with an opposite problem. The report of a commission headed by a retired civil servant recommended that divided 16 per cent for scheduled castes, the so-called Uu-touchables or Harijans; 6 per cent for scheduled tribes, that reservations for backward castes should be reduced from is the aboriginal inhabitants of the subcontinent; another 6 49 per cent to 27 per cent and called for the removal of a per cent for special groups such as the handicapped, and

large number of castes from an astonishing 44 per cent for Before Mr Hegde, who ap-pointed the commission to other backward classes, which Mr Rama Rao had increased bonour a commitment given basis of a by the last Congress chief surveys." Not unnaturally, the higher

minister of the state, could du anything, groups of the affected castes began calling general strikes and hurning his effigy. One further trouble is that the principal caste delisted is the numerically powerful Vokkaliga, who form an influential group within his own party and government.

Mr Hegde has temporized by rejecting the commission report. But even that has not stopped the problem. The Lingayats, the other politically powerful caste, lost the honour of being known as a backward caste a decade ago. They want the whole issue reoper want the whole issue reopen-ed, so that they can claw back their privileged position. The Vokkaligas and the Lingayats between them make

up oearly 75 per cent of the Janata legislature party. A hig dispute over the reservation policy may not only destroy the Janata Government, observers warn, hut may also rip apart the social cohesion of the state itself.

The Times of India notes: "The irony of it is that the ... report is the result of the first serious attempt made in post-Independence India to take account of the mobility of castes and classes and to deter-mine 'backwardness' on the basis of actual house-to-house

Uncertain fate of Sri Lanka prisoners From Vijitha Yapa Colombo

There are conflicting re-ports on the fate of two Sri Lankan soldiers captured by Tamil guerrillas last week and held in the Northern Province capital of Jaffna.

Some reports say that the Tamil guerrillas will exchange the soldiers for guerrillas who are among more than 1,000 Tamils held in prisons and detention camps in the south for alleged involvement with "terrorists".

But General Cyril Ranatunge, commanding the Joint Operations Command, said in the state-controlled Sunday Observer: "We are counting on the terrorists keeping their word about the release of the two captured soldiers".

He said no ransom de-mands had been made, and that the terrorists had informed the Government Agent in Jaffna that the sol-diers would be released after they recovered from their injuries.

The two solders, Gunner P. R. K. Fernando and rifleman K. W. M. Bandara, were captured oo Monday near Mannar in an ambush in which nine soldiers were killed. One is said to have a broken leg, and the other has pleurisy and a slight injury.

The Government claims that 65 guerrillas were killed and a large number injured in the fighting.

Meanwhile, the indepen-dent The Island newspaper reported yesterday that the Tamil guerrillas, based in Madras, would take part io the next round of talks aimed at a negotiated settlement of the ethnic problem.

Guerrilla leaders in Madras told The Island last week that they did not consider the current proposals a reasonable basis for negotiation.

The Tamil United Liberatioo Front has expressed reservations about Tamilspeaking areas of the Eastern Province merging with the predominantly Tamil North-ern Province, ownership of state land in the devolved provincial council areas, and Parliment retaining power to legislate even over matters

that have been devolved. It has also ruled out the possibility of signing an agree-ment with the Sri Lanka Government without the involvement of Tamil guerrilla. groups. -

Political observers say that Mr Rajiv Ghandi, the Indian Prime Minister, is expected to take some initiative in the crisis when he returns from hi

Contrasting views of reality 30 years after the Budapest uprising

## A socialist wonderland or country in decline

Part 1

control

Thirty years ago this week Hungarians revolted against the Communist authorities, the Communist authorities, symbolically toppling the statue of Stalin and demand-ing withdrawal from the War-saw Pact. Soviet tanks put down the uprising after bloody street battles. Roger Boyes, East Europe Correspondent, looks at how life has changed for the Hungarians, the dilem-mas facine economic reformmas facing economic reform-ers ond the rising social tensions in the most liberal of the Communist states.

Janos Kadar did not want to invade Czechoslovakia in 1968. He had his own bruised

memories of Soviet tanks in Budapest in 1956 and, after 12 years of political spring cleaning, he was about to launch into his own economic reforms

Walter Ulbricht, the East German leader, is said to have interrupted Mr Kadar's arguments, presented at a Warsaw Pact summit, and to have shouted: "If you think, Comrade Kadar, that you are helping the cause of socialism with your objections then you are making a big mistake. Once the American-West German imperialists have got Czechoslovakia in their control, then you will be the next to go, Comrade Kadar."

Well, Ulbricht was wrong, videos, personal computers Economic reform is now fashionable clothes, rock firmly rooted in Hungary and there has been no ideological records, Western sportswear, testify to a degree of upheaval

"We are, I suppose," drawls a young Budapest intellectual, "the kind of place that the Labour Party would like to make Britain into." After a American imperialists. West German revanchists come, spend their dollars and marks in the Budapest casino or Maxim's night club and leave with lighter wallets; Lenin Boulevard and the Karl pause: "Without the Soviet bases, of course." The second Hungary, as

seen by many natives, not just dissidents, is a country in decline. The economy has satisfied certain needs but is not growing with sufficient speed to meet everybody's Hungary: A generation after 1956 expectations There is a big, unpleasant

gulf between the rich and the poor. Work morale is low, the Marx University have not standard of living high, but under threat. Mnonlighting is a way of life. The sociologist, Istvan Kemeny, estimates that 80 per cent of Hungarians changed their names to Rockefeller and Thyssen and the party is still comfortably in There are essentially two views of how Hungary has developed since 1956. The have secondary incomes which equal their main in-comes. The private sector, first is that it is something of a both legal and illegal, pro-duces half the total of consocialist wonderland, where both legal and illegal, pro-the system can satisfy con-sumer needs; where the sumer goods and accounts for queues are in the bank not the a third of the gross national

butcher's, where market forces product. It is a treadmill society, that are tuned to demand but are much is clear. But the need to not unleashed in a way that would trigger unemployment. work hard - a compulsion not Vatca Utca, the busy shopunknown in Japan or West Germany - does not by itself ping precinct, is the showcase

to 22 per cent envisaged. Domestic consumption fell 4 per cent in 1985, real wages are still 5 per cent lower than explain why so many Hungarians are depressed by the state of their country. Some say it is fin de regime, a collapse in self-confidence that precedes a changeover of power. Others say it is because

## Six injured

If at first you don't succeed

Judging from yesterday's scheduling, BBC2 certainly believe that if something is worth doing it is worth doing again. In four programmes men were seen poking at small white balls with wooden sticks. In two others people were asked a lot of questions about sexual relations.

Finally, the evening was rounded nif by Diane Keaton giving a practical demonstration in Looking For Mr Goodbar of once never being enough.

## TELEVISION The two interrogatory at-

tempts to come to grips with sex, though, were as signifi-cantly different as the smiting of the balls with bockey sticks and spooker cues. In Thinking Aloud they tried discussing it with people who have not experienced it together. At least, if Roger Scruton, Juliet Mitchell, Michael Neve, Helena Konnedy and the new, intelligently less intrusive chairman, Michael Ignatieff, all chastely far apart on their sofas, ever have, they were not letting on.

In this week's Lovelaw, about Wires and Husbands, those questioned were in-disputably tainted with intimacy.

One of the programmes was notable for its personal revela-tions, the other for the jatellec-

tual clarity of its contributions. Thinking Alond, the odd aparça notwithstanding, left us as much confused as informed. On the other hand, Michael Neve revealed the importance of infidelity in his sexual initiation and Roger Scruton not only described himself as part of a "liberal" élite but showed a touching vulnerabil-ity in asking "Why is everyonc

always so unhappy about agreeing with me?". The message was much clearer in Lovelaw, which gave us Japanese, Egyptian, Hun-garian and Californian couples: men are bounders and women know it, though sometextures. times they have to be careful

## More blessed than the Booker

t is not often that a novelist features his own house in his work without changing its name. In Jack Higgins's latest multi-million best-seller. Night of the Fox, his house Septembertide in Jersey makes a major appearance: it is where Harry Martineau, philosophy don turned killer for his country, masquerading in wartime Jersey as Standartenfuhrer Max Vogel, comes across the man he believes to be Rommel but who is in fact Heini Baum, a brilliant mimic.

- 5.7

Such literary history should not pass unnoticed, so Collins arranged for a group of 15 journalists 10 fly out for lunch with Higgins at Septembertide. "Do you mind wearing this little label", asks the publicity woman. "Just so Jack and Denise can remember who they're talking to."

Higgins, dressed in black, wearing dark glasses, welcomes the group, introducing them to Denise, a blonde in green. Denise is his young wife of nearly two years. The group is given champagne and passes on to the balcony, agreeing that the view is breathtaking. Fresh air taken, people dawdlc back inside. Indian sculptures and dark seascapes decorate the room. Books abound on a selection of coffee tables: Graham Greene, Brian Patten, the hiography of Frank Sinatra, the Bookseller magazine and Tactics: The Art and Science of Success by Edward de Bono. A Misalliance by Anita Brookner is uppermost.

Higgins, a chunky silver watch on his wrist, approaches a journalist and starts talking. Several people have said to me Martineau's an amazing kind of character, where did you get him from, so I say. well, let's put it this way ....

On the other side of the room two

Off to Jersey's tax-haven, to help in a modest little celebration of Jack Higgins's latest multi-million best-seller, Night of the Fox, went Craig Brown ....

journalists discuss Higgins's age. On consultation, the publicity woman in-forms them that he is 57. He looks 15 years younger. Is his hair dyed? asks a ournalist, pointing out what might be henna. "Well, minc is", says the publicity

woman, managing a laugh. ... and so Richard Burton cornered mc in the foyer and he said, come on, you must have been thinking of me when you wrote that character . . .

THE TIMES MUNDAY OCTUBER 20 1986

THE ARTS

The group have been invited to come through and help themselves to junch lobster, salmon, beef. "Princess Michael was charming. A much maligned lady. I strongly disapprove of what the Press...." says a man from Hatchards. Press..." says a man from Hatchards. Hc adds that they have ordered 250 of the new Higgins hardback; a few years ago it would have been 500, hut what with the economic climate ....

... we were discussing things - you . know, fame, and why some people want to put you down - and Richard said to me. it's a funny thing, fame. And his exact words were . ...

Higgins has moved into the diningroom now and, while most of the journalists dig into the lobster, a semi-circle of four or five dutifully take notes as hc carries on Often, his replies are so long that the person who asked the question has disappeared from the group in search of more champagne by the time Higgins.

has finished answering it. ... take my life, for instance. Here yoo have someone who starts life in the

working class and suddenly you're standing there years later in a loo with a couple of cx-prime ministers, suddenly you're on This is Your Life, suddenly you're being asked your opinion on Any Ques-tions... and recently I did a show on Radio 4 called *The Year I Was Born* — you know. me one week. Patrick Litchfield the next, Bonnie Langford the week after . . . "

A local photographer asks a journalist if he has read the book yet. Yes, replies the journalist. There is a silence. Wandering back to the living-room, a group look at the photographs of the author on the grand piano. "Isn't that Jim Callaghan?" "Oh, and there he is with Clive James -

what's he doing with Clive James?" The energy of the man is incredible, agrees one of the Collins contingent in the dining-room. Chain-smoking, glass of champagne in hand, Higgins holds forth on being ignored by the British literary establishment. ... to totally change the perspective, let me put this to you: can you ever imagine Melvyn Bragg asking Jack Higgins his view on the future prospect of the English novel? Well, can vou?

he local photographer mendons that in the kitchen there are more photographs of Higgins with celebrities. A journalist sneaks into the kitchen with him. There is Higgins with Jimmy Saville, and there is Higgins with Mount-

batten, yes, Mountbatten, with Eric

Morecambe, isn't it, in the background. and there he is with Vera Lynn, and Antonia Fraser, and who's that? Oh, Billy Butlin.

Stephen Pettitt

Singing triumphant over all

Lucia di Lammermoor New, Cardiff

It would be offensive to the Welsh National Opera to suggest that their performance of Lacia di Lammermoor on Saturday night would have been worthy of an inter-national company. It was, quite simply, worthy of the WNO: one can hardly invoke higher standards in a year that has seen not only their Ring at Covent Garden but also the towering achievement of their Otello with Peter Stein.

The Lacis success, though, is altogether different in kind. It is not easy to see how this could ever be a producer's opera, and William Gaskill has been content to intervene very little, leaving things to the cast and, less happily, to the designer, Ultz. The visual aspect is indeed mappealing. One sees only a dark hillside littered with plastic rocks (if better plastic rocks than we had for Siegfried) and a set of near-black breeze-block walls. These can be trundled from side to side, but the sound and size of their movements is ludicrously out of scale with the music, especially when the lumbering machinery goes into action in the first set to the accompaniment of the harp solo that introduces Lucia. Given that the costuming is all

the hratalist set is merely nasty But in fact it is almost an irrelevance, because what matters in this production is uniquely the singing. Suzanne Murphy gives an astonishing performance as the heroine She sings from the start with a hlanched, almost vibrato-less tone, which suggests instability of mind hat which demands great stability of pitching: there is no room for accidents

on these exposed, glacial slopes of singing. Miss Mur-phy does not put a foot wrong. She throws her voice nakedly and daringly into the role, and is rewarded with a great personal success. She is always clear in the ensembles but never loses, by virtue of her clarity of tone, the sense of one on the brink of running mad Then, in the mad scene itself. she does not rush into derangement hut holds herself vocally and physically quite still, making the music work unsided, cool but potent, as the means of expression. It entirely suits this interpretation that the spurious flute-led cadenza is cut, to be replaced by a purely vocal exercise that makes loosened vocal cords, and a feeling almost of unwilled singing, signify loosened sens

Dennis O'Neill's Edgardo is also magnificent. His singing has always been Italianate and Hilary Finch | naturalistic in kilts and trews, cultivated, but bere he seemed

> Mr Clark avoids all the usual pitfalls that normally

beset plays dealing with the day of reckoning. Past disclusures only push on the present action. The cliches of habitual conversation turn savage and start biling the speaker. And the scemingly fixed relation-

ship between ironist and impostor becomes fluid as the bone-headed old General starts getting the better of the

The partnership between John Mills and Rosemary Harris offers more than luxury casting. There is acute pain in it, going to the hrink of ugliness, and there are extraordinary passages where death provokes them both into hysterical laughter. From Miss Harris, a great actress, this is no surprise; from Sir John collapsing into unmanly tears. aod exploding into brutal insults, before recovering his gentlemanly composure - it amounts to a new lease of life.

Irving Wardle

to gain a confidence that allowed him more freedom and resourcefulness. Nut that these were adventitious qualities: as with Miss Murphy, the expression appeared to arise simply from the fact of singing superhly and at the limits of possibility.

These two dominate, but there is a dark Enrico from Mark Holland, a grandly grim and grey Raimondo from William Mackie and a splendidly forthright Arturo from Peter Bronder, who will be repeating the role at Covent Garden in December, though aryone interested in this opera should be making plans to get to Cardiff immediately. Julian Smith whams home the accompaniment.

**Paul Griffiths** 

chorus, acceleration and drive, but for the most part it " was just the two blondbouffants of Rohh Heaton on drums and Jason Harris on bass, cootrasting with the scrawny figure of Slade the Leveller on guitar and vocals. Whether in terms of politics

or production values, they offered none of the current panaceas, only a naïve dra-matic idealism. "All of This" captured not only the chilling nuances of cold-war intriguing but also the horrors of terrorist campaigns, in a song of nnusually layered intensity. excellently played but through a rough sound mix. Unfashthey may be, but in their own way they have as much to say as Billy Bragg, and they make it sound considerably better.

## Better than luxury casting The Petition Wyndhams

From the time of its opening at the National Theatre in July, it was clear that Brian Clark's star two-hander was only passing through on its way to the West End. Whatever the reason for the South Bank preliminaries, Peter Hall's production has now found a snug benth as a thoughtful beantifully performed show pitched to the np-market commercial taste of people who want to encounter serious issues in the tor Manders. Imprisoned by her name, Lady Elizabeth Milne has spent 50 years theatre without being 100 UDSEL.

• In January this year 5,500 News International print workers went on strike in pursuit of a demand for "jobs for life". The strike put the workers in breach of contract, for which they were sacked - as their strike ballot form had warned they could be.

• The dispute came after several years in which the company had tried to reach agreement with the unions to open new plants at Tower Hamlets (Wapping) and Kinning Park, Glasgow, built at a combined cost of nearly £100 million. Over the years the unions had continually rejected company requests on manning and working conditions, but the general background to the negotiations was many years of industrial anarchy at Gray's Inn Road (*The Times, The Sunday Times*) and Bonverie Street (*The Sun, News of the World*) and an almost daily tug of war between management and unions over who was running the company.

 Finally, Rupert Murdoch decided to change tactics; to open the new plant at Tower Hamlets as a green-field site and to "start again" in a completely new relationship with the minons. It was the failure of the unions to accept the management's industrial relations blueprint for a proposed new evening paper, the London Post, that led to print workers at all four existing titles going on strike. As a consequence, the four titles were moved to Wapping to maintain production.

• A book on the origins and consequences of this historic dis-pute, *The End of the Street*, by Linda Melvern, provides a fas-cinating account of the workings of the newspaper industry, its management attitudes and its workforce practices. Neither News International nor Times Newspapers has co-operated with the author of the book (as she makes clear in a foreword). We do not necessarily associate ourselves with any statements presented as fact in the book nor any conclusions it reaches. But The Times believes that the book is important as the first attempt at a non-partisan account of what has become known as "The Wapping dispute" and so we begin today a four-part serialization.

## Part 1: The dash for freedom

t was oo Sunday February 10 last year, in his elegant but comfortable 12-room apartment on Fifth Avenue io New York, that Rupert Murdoch outlined the "dash for freedom" that was to revolu-tiooize his British newspaper op-cration. A group of executives had flown from Londoo on Concorde the day before and the meeting, which began at 10 in the morning, took place around the dining room

The project discussed that day

down his other four titles...if events turn out that you've pushed your luck, you've got a contingency plan.

This contingency plan would involve a computenzed photoset-ting system. Speed was essential: there was no time for "state of the art". Murdoch told the gathering that he wanted a system that was "dead safe" with good logistic support. He said: "We are not taking risks."

Those around the table who were familiar with his style knew Once he had decided he wanted something, he would throw money and energy into getting it. His enthusiasm was infectious. One executive described working on a Murdoch project as like "being on a magic carpet. Sud-denly you're off." Io the coming months, all of them would be

caught up in a whirlwind of activity. Matthews, an Australian who joined Murdoch in 1971 at the age of 47. was now to have a strategic role io the Post project. But towards the summer of last year he

'A Murdoch project is like a magic carpet. Suddenly you're off'

man wanted to film her standing in a machine room; he had to pay the Chapel Father £25 for the privilege. The salaries some carned amazed Dean,

But some seasoned union officials thought that Dean ap-proached talks with News loternational as if she were dealing with boy scouts.

The major problem - for managements and national union officials alike - was the Chapels (office hranches); their power was absolute and their Fathers (chairmen) were baron-like. Ray James, who always came to

work in a conservative navy blue suit carrying a briefcase, led Fleet Street's higgest Chapel, the Sun machine room. He had a reputaWhatever the problems, James, never blamed Murdoch, He thought him a reasonable "guy nor". He had sent Murdoch a telegram of congratulation when he bought The Times and Murdoch replied that it was "particularly pleasing" to have heard from

It was to the composing rooms, where stories were set into type and made up as pages, that the resistance to new technology was fiercest. The typesetters (linotype operators) considered themselves an elite within an elite - they even kept their wages secret from national union officials. Their Chapels (office branches) were all-DOWCITU Most compositors can remember a time when reaching £200 a week seemed an impossibility; by 1985 Daily Express "comps" had leapt over the £1,100 a week hurdle and a 1981 agreement at

Changing Fleet Street: Murdoch outlines his plans for the Post to his executives. "Once he had decided he wanted something, he would throw money and energy into getting it." was better to do as James said,

concerned the idea of a new London evening paper - the Post - which could eventually be expanded to a 24-hour paper with national distribution. One of those present described the gathering as "brainstorming meeting. We

discussed logistics." He added that if the company planned to produce a new paper using direct input by journalists thus cutting out the need for typesetters - Murdoch "would be out of his mind not to make damn sure the unions could not close

Midland

y would now be totally swept up by the plan - there would be nothing but work and no time for anything but what became known as the "Post Project."

Of those present, Bruce Matthews, the managing director of News International, had the most experience of Murdoch's addiction to challenge. He knew that Murdoch would now relentlessly drive them forward with his absolute commitment to the project - the chairman was not known for looking backwards.

them in the apartment to see one of Murdoch's more recent finds, Charles Wilson, then joint deputy editor of The Times. He was oow to play an even more important role in the Murdoch empire. Also there was Christopher Pole-Carew, who was loatned by the print unions for confronting them over new technology at the Evening Post in Nottingham, where Pole-Carew had been managing director.

And the presence of Ken Taylor, Murdoch's technical director, had

Brenda Dean, general secretar of Sogat '82, came to national newspaper negotiations after many years in Manchester. She London negotiations was at Times Newspapers after the 11-month was appalled by what she found in Fleet Street. "My job is to secure

shutdown in 1979. There were 56 Chapel Fathers (office branch agreement by persuasion, cajoling, chairmen) in the room. "It was logic and sometimes force of oceooation with mob instincts," personality based on other people's belief in my sincerity and Dean said.

"Have you ever attended a Fleet Street funeral?" she asked once. "It's like the Mafia." And she had never forgotten the time when, on her election as general secretary in August 1983, a television camera-

tion for always being after more money and ooe of his favourite stories was about how he coerced a manager into paying for his home telephone rental.

James would strike out at anybody, including those - like Bruce Matthews - for whom he had a grudging respect. During one dispute, Matthews marched into James's office. "I said it was his f- firm but he was in my office," recalled James, telling Matthews to leave. Sometimes it

Murdoch's Sun guaranteed compositors £43.000 a year. The basis of their payments had been the "London scale of prices" which dated back 200 years: it guaranteed extra pay for setting different sizes of type, for setting corrections and even for leaving

## Have clout, will travel

A t this time of year the political situation in Bermuda, Hawaii, Paerto Rico and the Caribbean becomes intensely interesting. Conversely, all politics in places such as Buffalo, Milwaukee and Minneapolis becomes a crushing bore. This explains why, like geese, members of Congress migrate with the seasons.

Common Canse, a self-styled watchdog body based in Washington, has discovered that not one member of Congress managed to squeeze in a visit to frozen Buffalo during last Christmas's recess. That would seem to demonstrate that the wretched town's high unemployment and crumbling steel plants dn not constitute a serious political situation when there is snow on the

But members of Congress did go to Boca Raton, in Florida, and to Las Vegas, there to ponder politics on the sun-soaked tennis court and golf course, all expenses paid by those who needed to whisper in Congress's ear.

Common Cause calls these junkets "the hottest trend in Washington influence pedding", which its researchers uncovered hy studying handreds of 1985 congressional financial disclosure statements.

time-honoured institution, a way of seizing a congressman's attention, giving him a day or two out of town and a cheque for \$2,000 or more by way of thanks. But it is being surpassed by the luxarioes junket, with fancy hotels and sumptuous meals, ometimes with the family invited along.

Some examples: Senator David Durenberger, a Minnesota Republican and member of the Senate Flogoce Committee, took his two sons

in metal but John Brown, Imperial Father of the composing room (head of all the Chapels combined) told the man putting the story into the page to stop work.

There was a heated row between Brown and Kelvin MacKenzie, Editor of the Sun, in watch brown demanded that MacKenzie run a disclaimer from the union. After two hours, MacKenzie agreed and he was also forced to run a 300word article by Scargill the next day.

rie refused to back down when the

kept the Sun off the streets for four days, much of it because of a row over which chapels should and should not be paid for the night the dispute began.

It was against this background that Murdoch had called the New Vork waveting, It ended have in the afternoon and Murdoch's exec-utives left with much to do. One key executive. John Keating. Murdoch's technical director, had a phone call to make that would change the face of the British newspaper industry forever.

## Foul-mouthed fury

on the problems he faced with the British print unions Ropert Murdoch would frequently mention one machine room..."I could go to my machine room at The Sunday Times, 500 people were employed there, I could never count more than 60 people at work at the same time. There wasn't much

work going on." On Saturday, January 11 this year - two weeks before the strike started - some Sunday Times printers saw the second edition copy announcing that a special supplement would be printed at Wapping a week later. They visited the machine room to see Roy "Ginger" Wilson. Wilson, Father of the Sunday Times Sogat machine Chapel, had a legendary reputation. He had once swim the Thames for a bet and emerged so filthy that his men took him back to the machine room and threw buckets of water over him.

An enormous, ballish man with a thick neck and huge hands, his closely-cropped hair is still sandy, though he is nearing sixty. His language is appalling. He seemed always on the verge of explosion. "What have you done about it?" Wilson asked when he read the copy for the special section. "You've set the f--- thing I suppose?" Wilson was becoming fed up with other chapels in the huilding always relying on the machine men for action. After the compositors had left his office, Brenda Dean rang. She told him there were certain guarantees and that Wilson's men should print. "I was choked," he said.

But Wilson did not leave it there. He toured the building in a rage until he found Bill Gillespie, then managing director of Times Newspapers, who was with Bill O'Neill, Murdoch's vice-president for personnel and labour relations, "I went polty," said Wilson. He told them they were dirty bastards. "You've taken the piss nut of us." An overseer was so frightened he left the room.

"Who dn you think you are?" Wilson said to O'Neill, who was wearing a sou'wester with the words "Boston Bears" on the front. "You're a bully boy and yon're going to f- well come unstuck. If you do this again you left, telling the men: "Dou't dn f---Wilson had met O'Neill during negotiations over the Post in October last year. "He called as 'you guys'," said Wilson. "If there's one thing I can't stand it's

yankee talk like that. He said it (the confrontation over Wapping) would be like a gunfight and when the dust had settled, whoever was left standing had won. I told him I'd shoot him in the back."

nce, when Murdoch tnored the Sunday Times machine room, Wilson claims to have told him: "If you don't piss off I'll dn yon for harassment

He was equally abusive to Andrew Neil, Editor of The Sunday Times. Wilson would call him 'Andy baby' or 'Sonny'. Although Wilson had held off

on Dean's instructions over the January 12 announcement of the special supplement, he was less pliant nn January 18, when the supplement was due to be printed at Wapping. The rest of the paper, as usual, was being printed at Gray's Inn Road, but Wilson told his people "they could pull it. We would put the plates on and theo destroy it."

the presses, but he also said: "Be my guest, boys - I don't expect you to pay attention to fine detail. We will dn it our way tonight." At midday on January 18, Dean Half the edition was lost. called Wilson to a meeting. He

Although the strike ballnt result would not be annonnced until later in the week it would be a vote for action. When Wilson left the huilding at 6.30 on the Sunday morning, he thought he was entering a strike like any other.

Dubbins told them the unions

## THE TIMES MONDAY OCTOBER 20 1986 MONDAY PAGE

Forgotten victims of murder The plain truth about beauty

The murders of Karen Hadaway and Nicola Fellows (above) have left their families devastated. Peter Evans talks to parents who have suffered the same fate and have formed a group to help them cope with the grief

copie may cross the road to avoid speaking to them. They need the chance of belp, but almost no one knows what kind to give. They are the Parents of Murdered Children, and their lives will never be the same again. The group, which is helping 45 families of children in many parts of Britain who were victurs of murder or manslaughter, provides them with a chance to come to terms with themselves.

People tend to avoid parents of murdered children because, if they have not shared the experience, they do not know what it is like or are oot quite sure what to say; they want to steer clear of something too hig for them to cope with. "It makes you feel isolated", parents say, "like a leper", Mr John Patient, who lost a daughter, said of those who passed by: "If only someone had just waved and gone on I could have accepted it." Mrs Heather Howden, a member of the group, actually takes the initiative to put people at their ease.

The group is a way out of isolation. The parents say they can let their hair down, laugh or cry or release their anger in calls for capital punishment. Beneath the conviviality of a meeting in the Enfield home of one murder victim there was obvious pain and tension, a search to come to terms with the borror they have experienced. Eight families were represented that

Sharing the heartbreak, parents whose children have been murdered: (from left) John Patient, Ann Robin n, June Patient, Wendy Turner. Margaret Buttle, John Turner, John Buttle, Daphne Vanghan, Peter Robinson and Joyce Sadler

confirmation that there is life after death." There are mixed feelings about religion. Mrs Margaret Buttle, whose son was killed, said: "Why did I bring up my kids in a Christian way, when this can bappen?" Be-cause of the strength of her feelings towards his assailants, she does not go to church anymore. She cannot ask to have her trespasses forgiven as she would forgive those who have trespassed against her. "I would feel a hypocrite", she said.

When there is a murder the rest of the family suffers too, not least because parents are frightened to let children out of their sight. They suffer nightmares and one girl, now

The feeling that is so difficult to come to terms with is sheer horror at the way they have actually died'

17, said: "My childbood ended at nine when my brother was murdered."

Lives can be shattered. One parent has, through ill-health as a result of his daughter's death, sacrificed more than £20,000 in lost husiness.

Anniversaries are the worst times. Mrs Rohinsoo said a lot of the any presents. There was no more Christmas shopping. No Christmas meal. We do have one oow. But now it is just another roast. It is Mrs Buttle said: "I have never put

up decorations." Tragedy has drawn Mrs Daphne

Vaughan and Mrs Joyce Sadler together in their expressions of grief. Robert Vaughan, aged 17, and Michelle Sadler, of the same age, were killed in February 1984. "They are both buried in the same grave." Mrs Sadler said. "We were only allowed to see them once, at the Coroner's Court at Southwark. That was through a glass screen. We would have liked to see them a couple more times."

She took a photograph of Mi-chelle to put in the coffin, "Unless I'm picked up I have to take two buses to go to the cemetery. I go once a fortnight, I also go on the day they were murdered and oo their birthdays with Mr and Mrs Vaughan, It was Robert's 20th hirthday on August 15."

Speaking from her home, Mrs Sadler said: I sit her for hours. I think about what she had gone through. We oever knew the motive. I suffer from a blocked memory. I imagine it was the shock. I can't sleep. I'm frightened of being alone."

Though she praised the police for the way they looked after the mourners at the funeral, and Mrs

daughter of John and Wendy Turner, was murdered in France while studying A level French on an exchange from a college. Mr and Mrs Turner and the Freoch police were under the impressioo that they would be met by someooe from the British Embassy io Paris, but they were oot. "We phoned the embassy for help while we were there but they didn't help, and we com-plaioed afterwards through an MP. They said they bad done everything they could in getting her out of the country.

Mr and Mrs Turner say they were told by the police to go home after, being shown the scene of the murder

'We had no one to come, like a social worker, and offer a shoulder we could have leant on'

and the body in the mortuary. "We refused to leave uoless we took her body with us." They had to pay for a private aircraft to get Samantha's body out as expeditiously as possible. It cost £2,000. The 13-year-old daughter of John

and June Patient was in New Zealand with them when she was murdered. Mr Patient is a roofer. It Her flat was empty and she had not gone to work. After persistent calls to the police station, be said, they told bim they would put her on the missing list. "We had no one to come, like a social worker, and offer a shoulder we could have leaot oo. Although we were Christians we were not church-goers, but the local vicar got to hear of the problem and came to us."

The group is within Com-passionate Friends, a self-help organization for bereaved parents. The National Association of Victims Support Schemes is providiog experience and backing. A project has been set up in Essex to give more aid to families of murder and manslaughter victims. Other ageocies involved include police, the probation service and Cruse, which handles all kinds of bereavement. Miss Helen Reeves, director of NAVSS, said it dealt with the police, courts, compensatioo and possibly funerals. If occessary it would refer people either to Cruse or Compassionate Friends.

Now NAVSS has decided to provide, in London, the first innercity counselling scheme to help families of murder victims. "We want 12 experienced people to work voluntarily with them," Miss Reeves said. "We want a paid person to set up a training programme, co-ordinate work and monitor it." The need is urgent. "We have so one to five. many strong emotioos and ir-From this original batch rational thoughts and feelings," Mrs Ms Then selected 12 photo-Robinson said. "Some people think" graphs for the final test. These they are goiog out of their miods were split ioto three groups of and it helps them to know other four, judged by the previous panel as being "very attractive", "average" and "very unattractive". Armed people with similar feeliogs. Because there are people in the same position it gives you bope. For the first two or three years you feel you with these photos of six men don't want to live, then you have and six women. Ms Then other responsibilities to keep you attached them to a fictitious going. I koow of only two bereaved curriculum vitae and asked 72 parents, not in the group, who bave Stanford students (divided committed suicide. Most of them into 35 males and 37 females) do find some sort of inner strength

American research confirms what we have always thought: a woman's face is often her fortune

If you believe that psycholo-gists have a solicitor's fluency to make the obvious sound profound, take heart from the results of some American esearch. The findings reveal that very attractive women have a decided advantage over their less attractive peers, and that Aristotle was right when he concluded that beauty was a better recommendation than any letter of iotroduction.

These and other truisms are contained in the successful doctoral thesis, "Benefits Of Beauty", submitted by one Ms Deborah Then, who studied social and organizational psychology at the Stanford Uoiversity School of Educa-tion io California. (One would have thought that average eyesight and even a cursory acquaintance with the films and TV programmes of ocarby Hollywood would have rendered such a disserta-

tion superfluous, but then it is never easy to select an acceptable topic for a PhD thesis ... ) In fairness to doughty Deborah, it must be said that when she was discussing her plans with ber professor, he (of course) dismissed the idea of measuring the impact of physical attractiveness as an un-important woman's issue. But when she came back to tell him she had decided to go ahead, she found him leafing through photographs of uodergraduates and complaining there were oo

good-looking women amoog them. After that, there was no stopping Ms Then. She set about her research with vigour and discipline. First she collected 99 photo-graphs (why not 100?) of students attending a husiness

school in Eastern USA. Inexplicably they were all smiling Caucasians, in obvious defiance of the black is beautiful proposition. None wore glasses, in possible def-woren should be aware of the crence to Dorothy Parker's warning that "men don't on them by a male-oriented make passes at women in society: they must be attrac-glasses", and cone (women or, tive to be desirable but are men) sprouted any facial hair. considered vain if they care men structure structure size about their looks. She aroues Twelve Stanford students, six males and six females, were that it is society which stresses then asked to judge the looks the importance of good looks,

suitable co-workers and (b) as a potential friend or date. a potential friend of date. After all that effort and time. Ms Then found that broadly speaking most people considered beauty to be very important, though "average-looking" women topped the list of desired co-workers (followed by average-looking men). This supported her thesis that "in work-related evaluations, neither extremely auractive nor unattractive individuals are desired as coworkers ... because in some work situations, men and women don't want the distrac-tion of an exceptionally goodlooking co-worker".

Less surprisingly, very attractive females topped the list of most desired friends. with very unattractive females at the bottom of the league table. The same gradation applied to potential dates. As Ms Then primly puts it: "Social desirability seems to be in direct proportion to any individual's physical attractiveness". But she detected a significant difference between the attitudes of the two sexes: "Men tend to prize

beauty more, while women cite a man's earning capacity as the most important criterion for date-selection", confirmiog what many a luckless Lothario bas discovered to his not insignificant cost.

In a valiant effort to placate militant femioists and give hope to plaio Janes. Ms Then says we should oot become paranoid about our looks. But women should be aware of the about their looks. She argues that it is society which stresses

anemoon.

Above all they can talk about their children almost as if they were alive, passing photographs round like any other family. Mrs Ann Robinson, the group's co-ordinator, said: "We feel that because we have come together, all the children have come together too."

Mr David Howden, who lost his daughter Tessa, aged 19, on January 10. said: "You can't accept that all that love and those thoughts and aspirations have gone." His wife has read books on reincarnation.

Most of the parents have been to spiritualists. One said: "You go for

feelings the parents had would arise over the death of any child, oo matter how it occurred. "The part that is so difficult to come to terms with is the sheer horror of the way they actually dic. I have physically vomited because the anniversary is coming up. She was to Germany with her

soldier husband when her son, aged 13, was murdered on his way to a youth club. Christmas brings few tidings of

comfort and joy, rather a bleak sense of loss. Mr Jack Heathfield said his 28-year-old daughter died on October 9, 1981. "Nobody got

were misgivings. Mrs Vaughan said: "I felt threatened by the police attitude. You don't know how to behave. I expected the police to be sympathetic, but they weren t. l understand now that that is the system, because we could have done - that's how they look at it. But later they were extremely sympathetic." The ambivalence towards police

and other officialdom came out most strongly in cases that had happened abroad. Samantha,

cost twice as much as the passenger Vaughan said they were marvellous fare to bring their daughter home in supporting them at the trial, there with them. Her assailant bas never been caught.

One of the most distressing aspects of their case is that they do not know to whom to turn for information. They say there is oo one to answer questions at the main police station in Auckland. Mr Patient said: "I wrote 10 weeks ago asking for my daughter's carrings and ring. I have had no reply."

Mr Heathfield had the appalling experience of finding his daughter's body in a boiler-room under ber flat in Camberwell, south-west London.

simply reacting to a world in

which men set the standards. Unfortunately, Ms Then makes no suggestions as to how this state of affairs could be changed. Until she or another psychologist comes up with the answer "average and very unattractive women might find solace in the words of Socrates that beauty is nothing but a short-lived tyranny'

a meeting at the English Speaking Union in London today should not be surprised by the absence of the main speaker. General Indar Jit Rikhye. A distinguished Indian soldier and former military adviser to the United Nations, he has fallen foul of the new visa restrictions which have resulted in huge queues at Heathrow. Rikhye was due to speak on "Western Europe and Peacekeeping Worldwide", but was told in Bombay that the new rules made his visit to London impossible; he promptly left for America, where he now lives. When I contacted his wife in New York last night she was diplomatically unforthcoming. Organizers of the meeting were more blunt: "It's an international scandal", said one.

DARKIE

 This charming carton of toothpaste was brought from Hong Kong by a colleague. And Haringey thinks it has problems with black coffee and blackboards.

## Kitcatt break

MPs will return to the Commons tomorrow to find that the Speaker is about to appoint a new secretary. The congenial Bill Beaumont is to retire soon, and his successor will be Peter Kitcatt, a senior civil servant who until last Friday was the Treasury's watchdog on defence spending. This may be something of a break for Kitcatt who, if not as brittle as his confectionary namesake, keeps bis flavour under wraps. "I am very much looking forward to it," he told me yesterday. And then, with all the self-projection of a Sir Geoffrey Howe, "I have a very ordinary Civil Service background." And yet, at the age of 58 he is taking on a daunting job. for which a flat in the Palace of Westminster is at least some compensation for the ghastly hours. If Kitcatt runs into difficulties during the early days, help will always be near at hand: he lives in Croydon, the north-cast of which is Bernard Weatherill's own constituency.

 Since when has freedom been a thing of shame? An ad for the right-wing Freedom Association inviting readers to send for its booklet "exposing Marx and Engels as racists" ends: "It will be sent to yon in a plain cover".

Double-edged

Seven months to May 1987; 12 months to October 1987; 19 to May 1988. By any reckoning the

next election is not far away. British election campaigns are brief and the exact date is seldom announced more than a month in advance. But they always cast a long shadow before - and it seems to be getting longer. In the United States every fourth year of government is paralysed by a presidential election. By the time we cast our votes on the party to lead Britain into the 1990s we may feel we have gone through a similarly elongated trauma.

Last May Ladbrokes was quoting Labour, at 11-8 on, as favourites to get most seats. Today the Conservatives, at 13-8 on, are preferred. The odds will certainly move again. We have got used to volatile voters.

Five years ago, within a mere 18 months each of the parties at one point dropped to 27 per cent or less in the polls and at another touched 50 per cent. During the 1983 campaign Alliance support went down to 13 per cent and up to 28 per cent. Within the last year, each of the three parties has been on top in more than one national survey.

Polls this year do suggest a new stabilization. Since Neil Kinnock became leader, Labour has never fallen helow a third of the vote in MORI's monthly polls and since January has stayed between 36 and 37 per cent. The Alliance in that time has registered between 20 and 29 per cent. But a continuation of this general stabil-ity cannot be taken for granted.

The basic arithmetic of the next election is worth repeating. Assuming uniform nationwide movements from the 1983 results, Labour and the Conservatives alike need at least 38 per cent of the vote to get a clear majority with 326 seats; the Alliance, with its strength more evenly spread, must get a daunting 42 per cent.

As Labour and the Conservatives strive for that goal, neither knows how to treat the Alliance's supporters. Should they be won over with smiles and soft words? Or are they to be hounded roughly, with the risk that they might be driven into the rival pen? So far both Conservative and Labour have done their best to

The recent correspondence about bats may well have provided for many people the first intimation that it is now a serious criminal offence, with substantial penalties, to disturb a bat; if you find a colony of bats in your loft and take them, gently and without even rightening them, to a hollow tree in your garden, you are liable to be prosecuted and fined up to £1,000.

I am not making this up, and it is not a joke. The bat law was slipped, a year or two ago, into a wider measure; but bowever it got there, nobody in Parliament pointed out that it was an outrage, so Britain now has a law which makes a criminal out of anyone found guilty of annoying a bat.

Thal does have its comic side, I agree, though its implications are not in the least funny. And I want to mention another episode which has a number of similarities to the bat story. You may recall that the measure originally proposed for making compulsory the wearing of seat-belts in the front of motor-

coming from?").

There is also the spectre of what

ignore the Alliance. It was notable how little of the oratory at Blackpool and at Bournemouth was directed against the two Davids and their followers. (Since two out of three Conservative MPs had an Alliance candidate as runner-up in 1983, this stood out starkly at Bournemouth).

If m the next election the Conservative and Labour guns stay trained on each other, and they score hits on each other's credibility, where will the disillusioned voters go? Surely they are more likely to take refuge in the Alliance's middle-of-the-road haven than to cross to the other side. However, for the moment To-

ries and Labour come out of the conference season with far more grounds for optimism than the Alliance. The Conservatives are united and cheerful and breathing down Labour's neck in the polls. One has to go back 33 years to find a governing party in a better position 18 months before an election

Yet the Conservatives do have to cope with their record on

## Anne Sofer Boston's great jobs party

Reston Despite the popular European view that America's East Coast cities are getting old, tired and tatty as the "centre of gravity" moves south and west, this his-toric New England capital 15 bursting with life: flourishing business, growing populations in the new satellite "urban villages", city centre redevelopment and rapid gentrification of the rundown inner city residential streets.

What has been happening? The community college principal to whom I put the question leant back and thought, while I waited for a high powered micro-economic answer. In the end he shrugged. "It's gotten trendy. Four national soap operas are based in Boston. There are colleges and niversities all over the place. There are pleaty of Victorian houses to do up. You can buy brie and chablis on every street corner. It's what the Yuppies like!" Presumably they also like the Harvard bookstall cafe - not

actually in Harvard but on chic Newbury Street - a wonderful place where yon help yourself to muffins and bagels and recent publications and swill them down with as much coffee as you can drink to the accompaniment of taped Haydn symphonies. It was here that I bought a book that nearly ruined my visit. Only by the greatest effort of will, having started it, did I put it down and look at Boston rather than read about its recent history. The book is Common Ground,

by J. Anthony Lukas. Winner of four literary awards, including the Pulitzer, it is a long narrative account of the desegregation of the Boston school system, as seen through the eves of three real families, one Yankee, one Irish and one black. Though highly specific, its scope is wide: the history of each family over many generations, and the politics of the local Democratic Party, the Catholic Church and the civil rights movement, are all part of the story. For the student of American society, it is a feast - surprisingly not yet uvailable in Britain.

The narrative stops in 1976, on a note of gloom. Bussing appeared to have only deepened racial antagonism, inner city crime was

becoming more and more vicious, well intentioned experiments in subsidized housing and the promotion of black businesses had foundered. The reputation of the

school system, not high at the start, had sunk even lower. Visiting the city for the first time ten years later, I had the sense of history having moved on.

Bussing continues, now without controversy but also without selfcongratulation either. The schools are all racially mixed, though with a minority of whites: 30 per cent now compared with 60 per cent in 1972. Whether or not genuification will alter this proportion remains to be seen; there are

further education are the major preoccupations. You hear mach about the "credential oriented society" and nowhere is it more important than in areas of high-tech growth like Boston. Many be tech growth like Boston. Many be employers and public authoritum now pay tuition floss for their, employees to get them back imp education part-time: in most case this is linked to a "credit" toward a degree in one of the scores of which and control to a scores of public and private colleges. Education is big business.

And business is involving isself. very much with education. In m remarkable turnsround, Boston isnow being quoted in other chies at a model of good practice. The "Boston Compact" is an initiative taken by the Boston business community as a way of doing something about what they are as the low quality of public educa-tion. The deal struck with the school authorities in 1982 was ambitious and startlingly simple, If the schools improved their performance, business would come up with the jobs for their students - part-time and summer jobs as well as full-time jobs for

high school leavers. An intermediary organization called the Boston Private Inclustry Council, jointly funded by public bodies, charitable foundations and private industry. organizm the placements, through a curver specialist" in each high school, hy message is simple: "Attend school and study and we will find you a and study and we will him you a job: stay away or fool around and we won't". This gives the scheme, such credibility that employeet and now pursuing the schools for workers rather than the other way-round. The career specialists thus have bargaining power. "Well, Mr Smith" (I overheard in one school) "I'll met wurt ich on the school). "I'll put your job on the books, but our students don't normally take that sort of work he the mte you're offering." Though the drop-out rate - the proport leaving school before the age of it - is still high at 43 per cant, attendance has improved rapidly, academic performance has im-

academic performance this en-proved too, though more slowly, The figures certainly indicate that industry has delivered on its side of the bargain. In 1985 93 per cent of all high school leavers were either in higher education of working full-time. Of the latter, 84 per cent had been placed through the Boston Compact. The current the Boston Compact. The current boom has helped, but the important fact to remember is that 70 per cent of Boston school leavers are black, Hispanic or Asian. They are sharing in the boom rather than remaining isolated in a rotting inner city core, as so often

appens elsewhere. Here is an idea for Britain, Such scheme would be difficult to implement in areas of high upemployment, but what of London, say, or Bristol? And, a final thought for Kenneth Baker: the whole scheme runs on \$1.8 mile lion a year. That is just over half the estimated cosl of one of his: (HRI)

With the grind of another parliamentary session almost upon her, Mrs Thatcher must be looking forward with ever keener anticipation to retirement to her neo-Georgian fortress in Dulwich. But a word of caution. In its latest newsletter, the local Labour Party points out that Dulwich is the second most marginal Tory seat in London (1983 majority 1,859) and confidently asserts: "Mrs Thatcher will be represented by a Labour MP." Good knockabout politics that could, however, rebound. Faced with such a prospect, she might decide to stay at No 10 for ever. BARRY FANTONI

cars was defeated in Parliament. Normally, such a defeat would have been accepted (compare the rejection of the Sunday trading proposals), but the lobby which was determined to compel motorists to fasten their seat-belts refused to abandon their campaign, and they had only to wait a

short while for victory. There is no point in going over that argument again, but there has been one important sequel. No mention was made by the seat-belt lobby during the campaign of extending the legislation to passengers in the back seats; we were carefully given to understand that the lobby had no further demands. But as soon as the measure became law, they began to demand that it should be extended. Wbether it is good or bad to fasten seat-belts in the back of a car is not the point; the point will be bow we were compelled to, and by whom,

and with what motives they acted. I have never believed that our democracy is likely to fall in a coup organized by Mr Bernie Grant, Mr Ted Knight and Mr Derek Hatton; our political centre of gravity is set reassuringly low. (Though we should bear in mind that after the next general election, even if the Labour Party does not win it, there will be scores of MPs who reject parliamentary democracy altogether.) The frontal assault on our society can be frontally met, and contained; but there is also the indirect approach to be considered.

I have written a good deal, in the last couple of years, about the Single Issue Fanatics, those monomaniacal figures whose entire lives are given over to one, usually very narrow, cause, aod in whose seething brains there has grown up the notion that their cause permits them any action whatever, including serious criminal damage to property and physical violence to people. But I believe that these groups, though they are much more than a nuisance, will not seriously harm our society or our democracy. But there is another route into the citadel, and it is, at present at least, not well guarded.

We are familiar with extremists of the Right and extremists of the Left. Now, I think, it is time to face the fact that we are in danger from extremists of the Centre.

These are people who would never commit crimes for their cause, much less injure other human beings; they do not have the blind stare and unreachable mind of the Single Issue Fanatics; they are even, in some ways, admirable citizens. But what makes them dangerous is their suffocating sense of their own rectitude.

The new Army of the Righteous are few in number. but great and growing in influence. Unlike the · PHS

familiar enemies of freedom, and most of the Single Issue Fanatics, they rarely claim to speak for millions; they claim only, but implacably, that they know what is best for us all. These people are the Moral Minority; they have no regard for democracy, not because they are totalitarian at heart but because they are so unshakeably convinced that theirs, and theirs alone, is the right path, that they will go to any lengths to impose upon millions who reject their beliefs the obligation to conform to them.

I do not exaggerate their conviction; one of the less discussed aspects of the Honeyford affair was revealed in a thoughtful, impartial and well-researched study of it published when it was all over. The dominant charac-teristic of those running the campaign against Mr Honeyford was found to be that they were literally unable to conceive of the possibility that they might be NTONS.

Let us now look in some detail the aims and methods of the Moral Minority. Its most obvious sub-division - in their behaviour probably also the nastiest - are the anti-smoking extremists, whose language and demands have long since taken on the full flavour of the persecutor, of course, smoking is very dangerous, but they are not content to point that out to those actually or potentially io danger. let alone to help and encourage them to abandon or resist the habit. No. they know what is right for us, and they will not rest until they have made smoking a criminal offence: the argument that in a democracy adults should be allowed to decide such matters for themselves simply cannot be got into their heads, for at heart they are simply not democrats.

Nor - and they will soon be as powerful and nasty as the antismoking extremists - are the food persecutors, that pestilent group who are in turn unable to confine themselves to pointing out the

ion of the Moral Minority is The Guardian, as anyone will know who recalls that wooderfully sickening leader advocating the abolition of the Last Night of the Proms because singing "Land of Hope and Glory" is a moral crime even worse than drinking South African orange juice. But the Moral Minority need no tuition in stnugness, certainty and an unshakeable belief in the purity of their own motives. Just listen to this, from the New

York correspondent of the Daily Telegraph:

The American television network. NBC, under pressure from femi-nists, has ruled that Miss America's statistics are not so vital after all. As a result

tonger learn bust, waist and hip measurements of the 51 contes-tants... The producer, Karen Aarons, is unrepentant about her decision. "Measurements are superfluous. They serve no other purpose than the public's curiosity". You will conclude that the

Some of the Moral Minority's Moral Minority had been at work. actions are far worse, because they But far more significant is the attitude of the producer: " . . . no other purpose than the public's of the recent archaeological con-gress at Southampton University, curiosity". No matter that the public is what Miss Aarons is there from which all South African to serve, nor even that the public pays her wages; she has decided that the public's curiosity must participants were banned, will pulse, in this case multiplied by the now characteristic cowardice not be satisfied. In these matters, Britain lags

only a little behind America. There are already people here who university authorities; that impulse is in its essence no harass and bully those who write the common element in both is Miss and Mrs rather than Ms, or that condemnation and exclusion who propose research into the respective achievements of difcrilerion. In antisemitism, a Jew is ferent races, or who prefer to hire pretty stewardesses for their airlines rather than the first ones to apply, however ugly, or who run over a dog rather than risk the question of whether he is a good Jew or a bad one. Similarly, the safety of human beings, or who prefer the interests of the living to South African archaeologists were banned because they were South those of posterity.

There is a widespread belief in Britain that the only threat to the stability of our democracy comes from violence. I believe that view is mistaken. But the actions of the Moral Minority, because they work more quietly and more decorously, are more difficult to detect, let alone resist. But that makes it all the more urgent that they should be resisted.

Home Office, is crawling with The greatest threat we face is of the Nanny State. Its agents are the them, as a glance at the case of the two-year-old Pakistani child. Moral Minority, who believe that Nanny knows best: they will not Khuram Azad, will make clear, The only point in the business that put us in concentration camps or have us shot, but will oblige us, if needs to be understood is that he they have their way, to conform to would have been legally entitled to their idea of our welfare. It is live here once certain procedures, therefore of the greatest im-portance that they shall not have which had long been under way but might take another month or their way. moreover . . . Miles Kington Right, folk, you can quote me

People collect very odd things. I know a TV producer who collects milk bottles and I once met a man at a party who told me he collected paper clips. ("I've got sixty dif-ferent ones," he said. "It doesn't sound a lot, but I never buy them - I only acquire them from other people's offices.") Nevertheless, I still think the oddest collection I ever came across was that com-piled by Jack, who used to work at Gaston's Bookshop, off Holborn.

He collected apostrophes. More accurately, he collected apostrophes when they were misused. One of the better items in his collection was a sign he had spotted in South London, Joes Eat's - no apostrophe after Joe, as there should have been, but one in Eats. where there shouldn't A double misuse of the apostrophe, or perhaps a migrating apos-trophe, it gave him extreme pleasure of a perverse kind, because deep down his sensitive soul was, I am sure, quite offended by this cultural ignorance.

But the misuse of the apostrophe, especially to denote the plural, has become so widespread now - one sees it printed on menus and hand-painted on official signs - that I am beginning to suspect we are seeing the emergence of a genuine new usage. Not a learned usage, but a folk usage. Linguists sometimes talk about something called folk etymology, whereby they mean a change of vocabulary which is due to a complete misunderstanding, Jerusalem artichoke for example, is so called because people have heard the original label. "Girasole anichoke", and assumed it must mean Jerusalem. People assume that the ham in hamburger refers to the meat, so we now have beefburger and cheeseburger. Although wrongly derived

these words are now part of the language. And it is quite possible that wrong punctuation, folk punctuation we might call it, can also become part of the language. At least, that is the only way I can explain something clse I have seen happening recently, and that is a lotal but fairly consistent misuse of double inverted commas. Consider these three messages I have copied down in the last month. "Excellent" house wine at £5.10 a litre. (On the blackboard at Gannet's, an Aberystwyth restaurant which would be seasetionally good and cheap if it were

in London.) • Daphne is in town and will give "you" a good time. (Sticker in a Bayswater Road telephone box). "No cheques" accepted without "a valid" cheque card, "No" company cheques accepted. (Printed sign in a garage in Crickhowell, South Wales.)

1.3

Now, by the ordinary rules of punctuation, none of those inverted commas makes much sense. Gannet's management may have heard someone calling their winc excellent, and decided to quote him. Daphne may regard you as fictitious or even dantly ridiculous. And it is possible that the garage staff took down a directive dictated hastily by the boss, and put into quotation marks only those words they were sure he had spoken. But what I think has happened

in each case is that the writer intended to emphasize the relovant words, and put them into inverted commas instead of underlining them, feeling size cerely, though wrongly, that it gave the words added strength. we rewrite the last statement at No cheques accepted without 4 ralid cheque card. No company cheques accepted, it looks mote orthodox and makes more sense.

These are far from being the only examples I have seen, is it to arrival of a new form of talk punctuation, the emphasic inverted commas, and will it become widespread despite the agonized shricks of embatiled grammarians? Can wrong publik ation become right punctuation # enough people adopt u?

## THE END OF THE BEGINNING?

Thirty years ago, when il became clear that the heroism of the Hungarian Revolution had been crushed by Soviet unks, a bleakly cynical saying made its way around Eastern Europe. The Hungarians, it twent, had behaved like Poles. the Poles had behaved like Czechs, and the Czechs had behaved like swine. Only in the Kremlin itself could such a sour witticism have prompted a smile because it described the fractured disunity of Eastem Europe which was a main prop of Soviet control.

Westerday's joint statement by 122 leading members of the degosition movements in four European countries -Poland, East Germany, Czechoslovakia and Hungary itself - is the first sign that the democratic forces of Eastern Europe may finally he overcoming their crippling divisions. It is a historic document. In time it may come to rank with the United States Declaration of Independence. Certainly the Soviet leadership, aware that its own genealogy can be traced back to small groups of apparently

powerless intellectuals facing a monolithic empire, will see it in that dramatic light. For the joint declaration does more than merely mark the anniversary of the 1956 Revolution. It links that great popular struggle with the other

struggles of East European peoples against the Soviet occupation of their lands with the 1953 East Berlin

It is right that the nation should regard architecturally. and historically distinguished buildings as community assets stages. All church demolitions outside the existing safeguards and not just as the disposable of the 1983 Pastoral Measure private property of their present owners. It should also will be subject to full listed building control; all proposed nerve itself to compensate the owners for any loss of income demoliuons under the Measure will be referred to the or amenity. Secretary of State, with the

The principle (if not the qualification) is enshrined in possibility of his calling a public inquiry whose recomthe system for the legal control mendations the church has of the alteration and demoagreed to be bound by. lition of "listed" buildings. But churches, which make up a substantial proportion of this national heritage, are exempt; and conservationist bodies have been clamouring for them to be brought within the system. They succeeded in persuading the Department of the Environment to investigate the issue, to publish a Green Paper, and to enter long and detailed negotiations with the churches. They have not succeeded, it is clear from Lord Skeimersdale's announcement last week, in winning the abolition of the principle of ecclesiastical exemption. The Church of England, which is responsible for most

workers' uprising, with the 1968 Prague "Spring", and with the rise of Solidarity in Poland. Its message is that these revolts were not just explosions of nationalist sentiment, each one the distinct and separate property of a particular people, of no great significance to its neighbours. Instead, they represented what the document calls "our joint determination to to struggle for political demo-cracy....(and) independence..." Since 1956, of course, the

East European puppet regimes have periodically attempted to buy off such political aspirations with economic reforms, more consumer goods and limited loosening of censor-ship. Nowhere has this been more assiduously tried than in Hungary itself where the Kadar regime operated the quietist principle of "be who is not against us is with us."

Such relaxation can be welcomed on the commonsense grounds that it is better to be governed by a mild tyranny than by a cruel one. But the document both claims and exemplifies that "goulash communism" has not succeeded in its principal aim of winning popular support for the satellite regimes. The spectre of the Red Army remains the indispensable condition of Soviet rule.

Despite superficial appearances, the Soviet empire is an unstable one, disturbed on average by one attempted revolution per decade. It has been better able to resist these ning.

periodic rebellions because il subjects were disunited within countries as well as between them. Yet this document brings together not just Hungarians, Poles, East Germans and Czechs, hut also Catholics and atheists. "rightist" nationalists and "leftist" workers, officially tolerated "peace" spokesmen and underground activists.

· · •

The Polish signatories, for instance, include Jacek Czaputowicz of the legal "Freedom and Peace" movement, Jan Andrzej Gorny of underground Solidarity, Marek Edelman, the last surviving commander of the Warsaw Ghetto uprising and now a cardiologist, Leszek Moczulski, leader of the underground nationalist movement, and Adam Michnik, who is usually described as the theoretical hrains behind Solidarity. These names are a list of the real political forces in Polish society beneath the frozen military-communist facade. And what is true for Poland applies also to other bloc nations.

With this declaration, on the anniversary of the greatest popular uprising against Soviet communist rule, the real political forces of Eastern Europe have begun to work together to regain their freedom. It is not, as Churchill remarked of another evil empire, the end. It is not even the beginning of the end. But it may be the end of the begin-

#### From Professor A. P. Miodownik Sir. The Astronomer Royal of Scotland, Malcolm Longair, has made an impassioned plea for an improvement in the communication of science to the intelligent layman ("Bring Einstein to the people", October 15) but he has wisely admitted that having a vision of a more scientifically infirmed populace does not define the means by which this can be readily achieved. The fact that most scientists are

- Line and Mark

only interested in discoveries which have particular relevance to their own speciality is probably the greatest stumhling block to communicating their excitement to the public at large.

The discoveries made by Einstein clearly rank amongst the main scientific achievements of the 20th century and have been the seminal influence on vast areas of technological advance. The reason that people do not respond to such apparently im-portant universal laws may quite simply be that even such allembracing laws have to be placed in a greater context. To reach for a unifying explana-

tion of the world of sub-atomic particles and the world of galaxies is a nohle, exciting and worthwhile pursuit, but where is the relevance of those laws to the world of human beings? Clearly they are relevant to the increasingly tech-nological environment in which we find ourselves, but is any connection being made with the existence or behaviour of human-

ity at large? The article in question tends to indicate that pursuing Einstein's ideas will lead the reader away from commonly perceived relationships into a world where everything is relative, transient and totally unrelated to normal human activities. It may well be very important to realise that such a world exists, but it is all too casy to give the impression that the commonly perceived world of human relationships is thereby rendered false and meaningless.

Until the two different viewpoints can be seen to relate, and not to be in conflict with each other, there will inevitably be considerable consumer resistance to theories which reduce the status of human existence to being a statistical quirk in a transient, and essentially hostile, universe. Judging by his autobiographical material, Einstein himself was very insistent that this should not happen, but regrettably his own views are not propagated with the

same ardour as his theories. Really bringing Einstein to the people would be a marvellous challenge, but trying to propagate his theories divorced from his humanity is likely to be counter-

LETTERS TO THE EDITOR

## Relative values and lure of Einstein NHS stick and which related directly to mankind

and his place in Nature. The impact of Darwinism, the debates concerning the origins of life, the age of the Earth and the possible heat-death of the Universe (more nf an issue before the discovery of radioactivity) all served a tendency in man to put himself at the centre of scientific issues. In physics the advent of

probability theory heralded a new view of determinism vs chance in the micro-world and these issues became philosophical questions.

The complexity of modern science is such that it would take a highly motivated people to leap out of the arena of Newtonian mechanics, which serves quite adequately our everyday experience, and wrestle with concepts which, when translated from abstract mathematics, serve to shat-ter our illusions about reality and present us with a world more amazing than our minds can easily comprehend. Perhans, with the help of science

teachers in schools, historians of science and philosophers predis posed towards metaphysics, this new enlightenment will come. Good luck to Malcolm Longair in his crusade.

Yours faithfully, HILARY MARTIN, 29 Murray Road, Wokingham, Berkshire,

From Mr Percy Halliday

Sir, I may be the fool who steps in where angels fear to tread, hut if all of us, scientists included, could adopt the remarkable humility of Einstein, what a transformation there would be!

He told Rahindranath Tagore that, though he couldo't prove it, he believed in a truth that was independent of human beings. And he wrote that he himself was content to investigate this marvellous universe and apprehend some small part of "the intelligence" that it disclosed. He was unable to believe that the scientist who made a new discovery was the first ever to have thought of it.

If Malcolm Longair wishes to bring this aspect of Einstein's teaching to the general knowledge of all of us, nothing but good could come of it. Yours faithfully

PERCY HALLIDAY. 43 Reynolds Road, Beaconsfield, Buckinghamshire.

From Dr Andrew Wilski

Sir, "Bring Einstein to the people" by Malcolm Longair, far from making the subject in question understandable, will in fact confirm the suspicion of many that much of this century's theoretical physics is humbug. None of the real technical achievements of our age are based on the theory of productive. It is probably more relativity or any similar speculaimportant, at this point in time, to tion, bring some humanity into the These speculations often de-

carrot approach From Mr Ivan Lester Sir. Mr J. T. Winkler ("NHS spur for the spurious". October 14) assumes that the sole motivation of NHS general managers is financial reward. If that were the case, that band of talented individ-

uals would not be working for the NHS. For the most part these people are talented professionals from clinical and other disciplines who have devoted much to the NHS and its patients.

The second majnr flaw in Mr Winkler's argument is the assumption that NHS general managers are responsible to nobody other than themselves. This is quite erroneous. General managers are responsible to a district ealth authority, which amongst other things, sets the expected standards and closely scrutinizes and assesses the work of the general managers in carrying out the policies of the authority (i.e., not the policies of the general

managers If anything, one of the great prohlems of health authorities is the lack of performance indicators against which authority members can measure the standards in their health authority against standards in other authorities. This is slowly

being rectified. Yours faithfully, IVAN LESTER (Vice-chairman,

Harrogate Health Authority). Stream Corner, Fulwith Mill Lane, Harrogate, N Yorkshire.

From the Chief Executive of the

NHS Management Board Sir, Mr Winkler's article does scant justice to either the philosophy or the working arrangements of the individual performance review and performance related pay schemes recently announced for the NHS.

The individual performance review scheme is based on the principles of the right of individuals to know what is expected of them, and to know how their performance is perceived. It provides a framework for discussing the key components of a post, including the routine running of the service, the tasks which need to be tackled, and the constraints on the individual in taking forward those tasks.

Performance-related pay is de-signed to recognise effective performance, as judged through-out the whole IPR process: it cannot be paid for by reaching a handful of targets whilst ignoring whole areas of the health service. In such a case a manager would fail to measure up to the wider objectives set for the post.

No system of performance review or performance pay can be entirely safe from manipulation, or indeed from more venial failings. We have, therefore, included a number of safeguards against too easy financial rewards. In particular there is a system of equity assessors who will ensure that objectives are sufficiently stretching and will oversee the performance assessment process. With common sense and good will, both measures will lead to more effective management and thus to the overriding objective of an improved service to patients.

this announcement as an expression of my sincere gratitude to al who during these days have ex-pressed their kind feelings towards me, for the joy they have given me. LEO TOLSTOY Count Tolstoy. The amiable letter in which COUNT TOLSTOY expresses this morning, through our columns, his thanks to those who from all quarters of the world and from every section of society have sent him greetings and gifts nn his eightieth birthday is a document which in more than me aspect is of quite exceptional interest. It assists us for one thing to realize with unusual vividness how the texture of international life tends constantly to become closer. Interchange of ideas and sympathies has its modern developments side by side with the more material and obtrusive methods of communication between one nation and another, and these invisible exports and imports, equally with the interests involved in less impalpa-ble commodities, make for that mutual understanding among nations which is perhaps the strongest of the forces working for the world's peace.... From a narrower and more personal point of view the celebration is equally striking. It is perhaps the strongest testimo-ny that has been given in recent times of the far-reaching fascination of character. For it is appreciation of his high personal worth, his truth, his self-abnegation, his relentless loyalty to the light as he conceives it, rather than percep-tion of his literary power or sympathy with his social ideal, that as won for COUNT TOLSTOY the affectionate esteem of vast masses of people throughout the civilized world.... It is pretty safe to say that it is Tolstoy the man rather than Tolstoy the novelist, or Thistoy the apostle, who has captured the imagination and esteem of so many people in so many different lands.... Nobility of purpose, high courage, a hlame life - these all can understand and admire and, displayed as COUNT TOLSTOY has displayed them in the peculiar difficulties in which his life has been led, they have appealed to the imaginations and the hearts of mankind with irresistible and searching power. ...

## ON THIS DAY

**OCTOBER 20 1908** 

21

"In the last 15 or 20 years of his life." according to an assessment of Tolstoy's influence in the Encyclopedia Britannica, "he was probably the most venerated man in the world." Yet his domestic life ended tragically. Two years after this letter appeared, because of a this letter appeared, because of a deepening estrangement from his wife, he secretly left his country home, Yasnaya Polyana, where he had been born in 1828, taking with his support with him his youngest doughter, Alexandra. Ten days later, on November 8, 1910, he collapsed and died in the stationmaster's office at Astapopo.

COUNT TOLSTOY'S THANKS

#### TO THE EDITOR OF THE TIMES

When, some months before the date, I heard of my friends intention to celebrate my 80th birthday, I announced in print that I much wished they would do

othing of the sort. But what I had not at all expected happened - namely, that from the last days of August to the present time I have been, and still am, receiving from most various sides such flattering greetings that I feel it necessary to express my sincere gratitude to all those persons and institutions who have addressed me so amicably and kindly.

I thank all the Universities, town councils, Zemstvo councils, educational establishments, societies alliances, groups, clubs, fellow-ships, and staffs of newspapers and magazines who have sent me addresses and greetings. I also thank all my friends and acquaintances, both in Russia and abroad who remembered me on that day. thank all those whom I do not know personally, of very various social position, including prisoners in gaols and exiles, who have greeted me with equal cordiality. thank all the youths, maidens, and children who have sent me their

angratulations. I also thank for their good wishes hose members of the clerical calling who have greeted me; and the fact that there are very few such makes me value their greetings the more highly. I also thank those who, together with their congratulations, have sent me eautiful presents.

I heartily thank all who have

rected me, especially those (the

majority) who, quite unexpectedly

to me and to my great joy, have expressed in their addresses full

agreement, not with me, but with hose eternal truths which, as best could, I have tried to express in my writings. Among these I was particularly pleased to find a majority of peasants and workmen. Excusing myself for my inability to reply separately to each institution and person, I ask all to accept

prospects for reform.

While M'Bow's departure

In return the Government has agreed to guarantee sufficient income for the Redundant Churches Fund to take care of buildings for which the church has no further use and which are too important to be

pulled down. That is fair. Because what is envisaged is a partnership rather than the full imposition of "secular" statutory control, it will, as Lord Skeimersdale acknowledges, require considerable goodwill on both sides. The conservationist interests should not let their failure to win all they were seeking sour that partnership from the outset, simply in the interests of proving that it cannot work and that they were right.

A relatively small proportion of the churches deemed worthy of protection by "listing" belong to the Free of worship.

#### MANOEUVRINGS BY M'BOW The euphoria among staff and ing the need for a successor

scepticism. Its terms were ambiguous. In French dipdiplomats earlier this month at Unesco, in the immediate lomatic parlance, when a politician says he is not a "demandeur" for a post, it is announcement by its generally interpreted as meaning that he would be delighted to receive an invitation.

The logical moment for M'Bow to have told the execntive board of his decision would have been a week earlier, when the procedures for inviting applications for the job were discussed. M'Bow was silent then. He appears to have been put under decisive pressure from his home government in Senegal on the very day of his wholly unanticipated disclaimer.

It has long been no secret that M'Bow is an embarrassment to Senegal which conspicuously failed to speak in his support at the OAU summit. But only now does it seem that the Senegalese government - seeing the damage that a third term for M'Bow might do to its other ambitions at the UN - has decided to turn positively against him.

Latin American countries, the Immediately after his stateweakest link in the Third ment M'bow had arranged for World support on which he African supporters to chime in relies, which looks like a return with appeals for him to stay. to the campaign trail. But the hope was frustrated by the Wesl German and Venezuelan Board members. make it clear that it will rejoin Unesco only if it again bewho rushed to congratulate" M'Bow on his "courageous" comes worthy of its charter, its management is cleansed of decision and called for applacemen and its programmes plause. ## **Bishops' dilemma over Dr Leonard's** war of American independence

This week the hishops of the Church of England have to decide how to iotervene in the so-called Tulsa affair, concerning which a fierce quarrel has broken out between the entire Epis-copalian hierarchy in the United States and the Bishop of London, Dr Graham Leonard Graham Leonard. The American House of Bishops

The American House of Bishops has condemned to the strongest terms his decision to take an Anglican parish in Tulsa, Oklahoma, under his own pastoral wing, and they have appealed to the English House of Bishops to "discipline and correct" its third most senior member.

So the Archhishop of Canterbury, Dr Robert Runcie, has put the matter on the agenda for the hishops' meeting now due. It is as tricky a predicament as they have ever faced. The official American complaint was tinged with resentment that Dr Leonard seemed to be acting as if the American Revolution had not happen, saying he was setting himself up as a judge of the "competency" of their canonical processes used against the Tulsa parish and its priest, Father John Pasco.

There are smouldering historical embers ready to be enflamed here, for American Anglicans have not forgot-ten nor entirely forgiven the Church of England's attitude to them 200 years ago; because the English church was hostile, the American episcopal succession had to be derived from the Scottish Anglican church instead. And bishops of London once acted as the Church of England's Colonial Office in those places overseas with no hishop of their own, as shown by the only recently extinct title of one of the London suffragans, the Bishop of Fulham and Gibraltar.

It was the present Bishop of Fulham that Dr Leonard originally intended to send to Tulsa this month

The Bishop of London: Opposing the ordination of women.

to carry out confirmations, and the name will not have helped cool American tempers. The American hishops have reacted as if the Bishop of London was intending to start an English-derived Anglican church in the United States, parallel to the Scottish-derived one.

There are numerous small groups of disgrunted Anglicans apart from Tulsa, the so-called "continuing Anglicans", who have broken with the official Episcopalian church over the issue of women's ordination, and who might not mind if Dr Leonard had on his staff a man who was in effect the Bishop of Fulham and America

This would support their claim to be the "real" Anglican presence in the United States, and appear to bring them back into communion with the Archhishop of Canterbury by another route.

The American House of Bishops is

also well aware that the Bishop of London is the leading opponent of the ordination of women; and they are resentful already at the Church of are resention already at the clutter of England's failure to extend recog-nition to American women priests. If one of their women priests wishes to visit England, and to exercise her priesthood while there, episcopal visioo rapidly develops the Nelsoo

Dr Leonard in turn has warned of dire consequences should an American woman priest be ordained a hishop; and said he would have to consider whether to refuse to attend the 1988 Lambeth Conference if an American woman hishop was

Dr Runcie has already tried to talk Dr Leonard out of sending the Bishop of Fulham to Tulsa, but with the opposite result to the one intended: Dr Leonard let it be known that he would go himself. He has nothing to lose even if it leads to a monstrous new for he avoid achieve a mubic row, for he would achieve a public demonstration of the divisions and tangles likely to ensue in England should the church here in turn decide

in due course to ordain women. That domestic issue has already become bogged down on the question of hishops' jurisdiction, and one of the more far-fetched proposals for meeting it involves two parallel sets of bishops, one with women priests and one without. It would be a clever political tactic both to press that idea. as hard as possible, as the only possible solution, while at the same time proving through the Tulsa case how very messy the result would be, so that even Anglicans who favoured the ordination of women might begin to back away. Meanwhile the other train is rush-

ing down the same tracks in the opposite direction, to use the Leonard

Communion services are not illegal provided they are "private"; and even if they were, the Bishop of London's camp has, no right to complain because this is simply the reverse of what he is doing in Tulsa. Whatever preconceptions the American church may be under, the English House of Bishops has no jurisdiction over Dr Leonard in this matter, though it could and probably will state a critical opinion. will state a critical opinion. It then would be open to Dr Leonard to press for a deal, by offering to comply with such a judgement on condition that the American House of Bishops issued an instruction to American women priests not to celebrate Holy Commn-

nion in England. What is clearly needed, in the interests of restoring good relations between the English and American branches of the Anglican Communion, is mutual agreement to respect each other's sensitivities. In the present climate to press theological convictions to the ultimate, even in the name of utter conviction, is the shortest route to tearing Anglicanism ia two.

## MR I.G.H. CAMPBELL Lawyer of broad sympathies metaphor. The Movement for the Ordination of Women reports an increase both in interest and io

Mr Ian Campbell, TD, QC, died on October 16 at the age of 77. He was a man of conventional training and ap-parently conventional out-look, who nevertheless showed an uncommon range of sympathy and insight while serving, from 1963 to 1979, as the Lord Chancellor's Legal Visitor. membership, particularly since July when the general synod turned down the Women Ordained Abroad Measure; and it is now quietly but actively encouraging celebrations of Holy Communion by visiting women priests, some of them American, in England. The Eucharist at Church House Westminster, two weeks ago is only one of many examples, though most have been more discreet. Defenders of these tactics argue that such Holy Communion services are not illegal

OBITUARY

Visitor. Ian George Hallyburton Campbell was born on July 19, 1909. He was educated at Charterhouse and Trinity College, Cambridge, before being called to the Bar in 1932. As a barrister he was n member of both the Inner Temple and

Lincoln's Inn. During the war he served in the Artists' Rifles and Rifle Brigade. By 1945 he was a full colonel, having been GSO2 at 1st Army headquarters and Chief Judicial Officer to the Allied Commission in Italy. After the war ended, and before be was demobilised, he was the chief British legal officer to the military government of Austria.

Returning to civilian life he built up a flourishing practice, , as a junior at the Chancery Bar. But after taking silk in 1957 he found he was not doing so well, and this relative lack of success may have influenced his decision to accept the post of Lord Chancellor's Legal Visitor in 1963.

His new role was to keep an eye on the "patients" for whom the Court of Protection is responsible, and, since at any one time about 3,000 out of a total of 20,000 or so needed to be visited, the task that he shared with three Medical Visitors was very demanding. During an aver-age year be would personally visit five to six hundred

people. But it was not simply, or even primarily, the numbers involved that made the work so difficult. By its very nature it required him to deal with human situations that could be extremely awkward, baffling, alarming, painful or pathetic. To all of them he brought qualities of understanding that far transcended anything that could reasonably have been expected of

him His interest in the problems he faced was by no means confined to their legal aspects. and his reports to the Court were read with special appreciation. His retirement to 1979. was much lamented.

Though not the easiest man to get to know, he was essentially sociable. He liked traditional company, and cn

joyed playing bridge at

He married, in 1949, Betty Lolande Bruno (nee Maclean); who survives him

**MRS JEANNE** 

MacKENZIE -

Mrs Jeanne, MacKenzie, FRSL, who died on October

t6 at the age of 64, was best-

known for the biographies of Charles Dickens, H. G. Wells and the First Fabians that she wrote in collaboration with

her husband, Norman Mac-

Kenzie; and as co-editor with

him of the recent four-volume

edition of the Diary of Be-

atrice Webb. But she also won

acclaim for books that she wrote on her own.

born at St Helen's, Lancs, on January 30, 1922. She was

educated at Cowley Grammar

Daisy Jeanne Sampson was

with a sou and a daughter.

Brooks's.

## Mr J.C. Row and Miss A.M. Lambert and Miss A.M. Lambert The engagement is announced between James Christopher, younger son of Major and Mrs J.W.L. Row, of Whistley House, Potterne, Devizes, Wiltshire, and Anna Mary, younger daugh-ter of Mr and Mrs R.G.W. Lambert, of Schnabelsberg, Eiosiedeln, Switzerland.

## **Record price for sofa**

Sale room

## By Hnon Mallalieu

A sale of American furniture and works of art held by Christie's in New York on Saturday totalled \$3;161,455, or £2,180,313. An elegant "double-peaked camel back" sofa in the Chippendale style made in Philadelphia between about 1765 and 1785 went to a

New York collector for an auction record of \$605,000 or £417,241 (estimate \$250,000-Most of the more expensive

items on offer were sold to private bidders, and the same chestra. price was paid for a Philadelphia Chippendale marble topped side table of much the same date. This had once belonged to Governor John Penn, of Philadelphia (es-

pattern back and claw-and-ball feet, which dated from between 1760 and 1775, sold for \$242,000 or £166,896 (es-

BITTINGAYS TOGAY Mr Hume Boggis-Rolfe, 75; Sir Edwin Bolland, 64; Major-Gea-eral T. Brodie, 83; Mr Ray Buckton, 64; Mr Alfredo Campoli, 80; the Right Rev Dr H. J. Carpenter, 85; Mr Law-rence Daly, 62; Professor Sir. Douglas Hague, 60; Mr Eddie Macken, 37; Mr Sylvester Mintee, 30; Lord Montagu of Beaulicu, 60; Sir Roger Ormrod, 75; Professor S. B. Saul, 62; Sir William Shapland, 74; Sir Alexander Stirling, 60; Sir Ian Trethowan, 64; Mr Timothy West, 52. timate \$60,000-\$90,000). Another auction record was claimed for a wind instrument, a Bochm-system flute made in 1939 by Verne Q. Powell, of Boston. This was exhibited at the World Fair in that year, and thereafter was often used hy William Kincaid in his appearances with the Philadelphia Or-

The price of \$187,000, or £128,965, was no doubt helped by the fact that the flute was made of platinum.

Colonel Sir Fordham Flower and of Lady Flower, of limington. The Rev Victor Story and Canon Dilwyn Davies officiated. The marriage took place on Saturday, at the Episcopal Church of St John the Baptist, Bowling Green, Ohio, of Profes-sor Andrew Glass and Miss Lilly Mae McGill, both of Bowling

The bride, who was given in marriage by Mr Charles Flower, was attended by Léonie Flower, Tara Freeman and Anna Gallie. Green. Mr C.J. Winberg Mr Kenneth Coker was best man.

Mr C.J. Winberg and Miss J. Arfwedson The marriage took place on October 4, in the Swedish Church in London, between Mr Carl Johan Winberg, younger son of Mr K. Winberg, Stock-holm, and Mrs G. Davidson, Mallorca, and Miss Jennifer (Candy) Arfwedson, daughter of Mr C.J.E. Arfwedson, Guadalmina, Spain, and Mrs E. Grant, Woodgreen, Hampshire. Mr R.W.G. Astell Mr R.W.G. Asseli and Mrs S.M. Thompson The marriage took place on Saturday in London of Mr Richard (Robin) Astell, son of Major Henry Astell and Lady FitzHerbert, and Mrs Sarah Mary Thompson, daughter of the late Mr Robert Bellord and of Mrs Bellord.

## FitzGerald in appeal for common front against IRA

## By Richard Ford

MPs given damages in

Dr Garret FitzGerald is to urge all democratic parties in the Irish Republic to repudiate the political wing of the Provisional IRA in an sitempt to win parliamentary seats.

, j 🖻

led government. The poll gave Fianna Fail 53 per cent of the vote, Fine Gael 27 per cent, Labour 6 per cent, Progressive Democrats 9 per cent, and 3 per cent to the Workers Party. Even worse, the party's biggest asset, Dr FitzGerald, has suffered an 8

FitzCrenald, has suffered an 8 per cent loss of popularity, giving Mr Charles Haughey a 12 per cent lead as the man most people would prefer as the next Prime Minister. Dr FitzGerald claimed that supergrass trials in Northern Ireland were being phased out and said their use had been

and said their use had been one of the issues the Irish Government bad been raising

most forcibly since the Anglo-

His demand for a common stand against Provisional Sinn Fein was greeted with loud applause at a Fine Gael annual conference, effectively the un-declared opening of the next general election campaign.

The election is not due unlil November 1987, but the un-certain poliucal arithmetic and a worsening economic situation may force a snap poll this winter or force the government to go to the country early in the new year when it must introduce a tough hudget.

Dr FitzGerald's address on Saturday concentrated on domestic issues, with the employment problem being seen as the most serious issue facing a country where half the population are under 25. But an opinion poll published yesterday showed the diffivesterday showed the diffi-culty Dr FitzGerald faces in south Belfast on Saturday his efforts to secure an historic night.

Irish Agreement was signed almost a year ago. "We are satisfied that there has been a significant shift, possibly a conclusive shift in altituded towards that method of trial." A "loyalist" paramilitary A "loyalist' paramilitary feud is suspected of being behind the death of Mr William Dickson, aged 39, a father of four shot dead in the

## 'Panorama' libel case Continued from page I

MPs yesterday refused to comment on any likely agree-ment, it is understood that a governors' meeting on Thurs-day, chaired by acting chair-man of the BBC, Lord (Joel) Barnett, decided to order a settlement because of factual inaccuracies in the pro-gramme, based largely on a confidential report prepared

by the Young Conservatives. Yesterday, Mr Richard Fuller, YC chairman and a member of the group which endorsed the infiltration report by 39 votes to one, pledged financial backing to the man behind the revela-tions. Mr Philip Pedley, who still faces legal action by MPs.

But Mr Moate, who won an apology, legal costs and BBC donations to constituency charities, yesterday demanded the resignation of producers and journalists involved in the

that the BBC has decided to settle. The programme was fabricated and evil ... a 90 concoction based on the malice of political opponents." Mr Proctor felt that any agreement announced in court today would help clear the reputations of all five Conservative MPs - Mr Warren

Hawksley (Wrekin) was the fifth - who were named Senior journalists at the BBC, however, were furious over reports of a settlement, particularly at a time when Mr Norman Tehbit, Tory party chairman, has announced that Conservative Central Office would be monitoring political coverage by the Corporation with lager.

One journalist said: "It will look like a climbdown. Fac-tual inaccuracies in a pro-gramme are one thing; the perception that we are pre-pared to knuckle under to political pressure is something else."

"I am not at all surprised else." | PB010g Panorama settlement, page 2 | Pepper.

Mr Stephen Liddard, amateur pumpkin grower, is using rock and roll and lager to chase a prize of £12,000 for the heaviest world's pumpkin.

Mr Liddard, right, of Hailey, near Hoddesdon, Hertfordshire, grows his pumpkins hydroponically in a pumpkin-shaped greenhouse, above, which he designed and built. He plays rock and roll music to the pumpkins and supplements their diet

To win the prize money, put up by the Unwins seed company and Gardening News, Mr Liddard must beat the existing world record of 670 pounds. Photographs: Mark

## Washington shock at Kremlin expulsions

Continued from page 1 correspondents here that in the wake of the Reykjavik summit and attempts to salvage something from it, the issue had been resolved with-out a great loss of face on

either side. Until yesterdaysenior of-ficials on both sides appeared ill-will that this incident has aroused will now make it even to be putting a more optimis-tic gloss on the proceedings in more difficult to return relations between Moscow and Iceland.

Washington to an even keel," The expulsions and a threat by Mr George Shultz, the US Secretary of State, that the American government would react, has caused consterna-There was immediate speculation that it could damage efforts to reach new arms control agreements in Geneva.

tion among the American diplomatic, business and Western diplomats claimed. last night that the Kermlin's move was intended by Mr journalistic community res-Gorbachov to demonstrate to Kremlin hawks that his recent ident in Moscow and Leningrad.

State visit to China a success say aides

Continued from page 1 interpreter, the Duke was speaking loudly to another member of the welcoming

The Queen was five min-utes late for ber official welcoming ceremony in Tie-nanmen Square in Peking; premier Zhao Ziyang was precisely five minutes late when he arrived to bid the Queen farewell from her Pe-ting aust house

Queen farewell from her re-king guest bouse. The Queen, despite being the embodiment of a feudal ruling class that is anathema in China, was treated with exceptional bonour by ber

hosts. She met China's four top leaders, one more than President Reagan met during his visit in 1984. It is seen as a visit in 1984, it is seen as a measure of Chinese satisfac-tion at the Hong Kong agree-ment, and of their desire to trade with Britain, provided British firms can be competit-

The Queen's party, on the other hand, has been particu-larly impressed by the ef-ficiency of the Chinese in organizing the visit, despite the occasionally over-zealous attentions of security men towards members of her staff, and by the crowds, especially in Shanghai, who turned out to see ber. The Chinese are naturally curious and love joining a throng, but the estimated 2 million who packed her route in Shanghai surprised both the British and the Chinese.

One thing that still puzzles the ordinary Chinese is why the Queen often appears to look so glum in public.

Her reputation was rescued on Saturday, on the last day of her tour, when she visited a kindergarten in Canton and looked quite delighted to be mohbed by small children. The Duke, meanwhile, was on his best behaviour touring a country village, where the head man boasted a Japanese colour television and a stereo system in his otherwise spar-

## Financial **Bill faces** Ezra threat

Two controversial investor protection issues will be de-bated in Parliament today when the Financial Services Bill completes the report stage in the House of Lords.

Government's The ammendment to the Bill which imposes an industrywide compensation scheme on the investment sector will meet some opposition .. Lord Ezra, the Alliance

peer, has tabled an amendment which aims to give the self-regulating organizations more say in deciding to

participate in an industry scheme. The Government is, how-

ever, likely to win the compensation debate, not least because the Labour Opposition tried unsuccessfully to introduce a similar provision at the committee lighted in the equity market

stage of the Bill in the Commons. The Government will be opposing another amendment from Lord Ezra, prompted by

the banks and building societies. They are concerned that

proposals from the Securities and Investments Board – the designated agency under the Bill – will impair their branches' ability to sell in-proposals from the Securities the system. The main problem was the delay between the time marketmakers entered new prices into the system and the

**Big Bang anger** over faults on rehearsal day

#### By Michael Clark and Richard Thomson

A rift has developed be- as 20 minutes. Many tween the Stock Exchange and member firms about the efmember hrms about the et-ficiency of its new screen quoted prices system SEAQ (Stock Exchange Automated Quotations) after the full dress rehersal on Saturday for Big Bang on October 27. Mr Patrick Mitford-Slade, a

stockbroker with Cazenove and a leading member of the Stock Exchange Council, said vesterdayhe was pleased with the operation. "It's been a very successful day's trading and the system has performed exactly as expected."

But a heated post-mortem examination between Stock Exchange officials and member firms on. Saturday pro-duced a long list of complaints and faults found in the system.

"There appears to be a fundamental problem in the system," said one harassed marketmaker on Saturday. "On the evidence, I would expect the Stock Exchange must be disappointed with its own performance and that of some of the marketmakers. A lot of people have been found

wanting." At the same time the gilts market rehearsal, the second in a month, went comparatively smoothly despite the disruption of a fire at the

Central Gilts Office, which handles settlements. There was a further 15-minute failure during the afternoon. Among the problems highwas the time delay in new prices appearing on dealing

screens, dealers refusing to answer the telephone, problems with telephone communications, long delays in completing a transaction and dealers deliberately misusing

house life assurance and unit price appearing on their screens - sometimes as much

marketmakers blamed the Stock Exchange's SEAQ system but the Exchange said that its own tests showed that SEAQ had never taken more than two seconds to post a new price. Among those who stopped

quoting prices during the day were Scrimgeour Vickers, Kleinwort Grieveson, Kitcat Aitken and Rowe & Pitman. Mullens, If the fault is with marketmakers they may be forced to spend more on top of

the millions of pounds they have invested already in sophisticated equipment. Persistent delays leading to out-of-date prices would make the new screen-based dealing system unworkable because

marketmakers are obliged to deal at the prices shown on their screens. The Stock Exchange said that during the day several marketmakers had been

three dealing system. And of faults reported during the day, 30 had been resolved by the end of the session, the

to answer," said a market participant,

The time delay in posting prices was given as the main reason because dealers knew the prices on which they would have to deal were out of date. Ignoring calls is against the rules for marketmakers, who are obliged to make prices to any competitor who

The Stock Exchange's internal telephone system (known as STX) was heavily criticized by brokers and this week.

The brokers complained they could not get through to the marketmakers and valu-able time had been wasted. One firm called in a British Telecom engineer to check its system. He told them the phones were working normally and the problem lay with the internal exchange. Another stockbroker gave a

warning that the STX system was inadequate and would not cope with the increased vol-

ume expected to be generated by Big Bang. Most of the big firms had started to instal direct lines. Some dealers admitted that they had been deliberately misusing the system. When they could not cope they switched their prices from yellow to red on the screens meaning that they were not open for dealing - although they insisted that they would

still quote to any marketmaker who contacted them by telephone. That is illegal because marketmakers are obliged to

quote real prices on their screens throughout the trading day. Under normal con-ditions, not quoting a live price for a stock on his screeo could lead to a marketmaker being banned from trading in that stock.

There were complaints also about the length of time it took to execute a transaction. One dealer at Phillips & Drew said it had taken him one bour and a half to complete just 13 trades. That compared with about half-an-

rises on this pattern as a new clutch of exhibition halls start opening their doors. This forecast came yes-terday from Mr Lonis Bizat, general manager of Alexandra hour under the old system. Other players, fruistrated by the length of time their "script" of orders had taken to execute, reverted to tra-ditional methods. "It was three times quicker dealing on Palace and chairman of the British Exhibition and Venues Association, as he inspected the floor," one broker said. the almost completed trans-

ments of the City code.

almost immediately.

AE, the engineering compo-tents group, will make a lastditch attempt today to overturn a ruling by the Takeover Panel which has given Turner & Newall, the asbestos group, the go-ahead to launch a new takeover bid. If it fails, Turner & Newall will swiftly mount a new offer. Last night, Sir Francis Tombs, the company's chairman, said: "We obviously would have to read the terms of the final judgment of the Panel and then look at market con-ditions before making a de-cision. But it is fair to say that the logic remains unchallenged - AE would be better off with us." The Takeover Panel has not

formally announced the results of its lengthy investiga-tion hnt is widely understood to have censured AE's finan-cial adviser, the stockbroking firm Cazenove, and the merchant banker Hill Samuel, over buying of the company's shares in the closing stages of the last £260 million takeover hid, which left Turner & Newall just 1 per cent short of gaining control. There is also understood to

have been criticism of the role played by the Midland Bank. So far none of the parties has commented on the Panel's findings but they were told of the outcome at the end of last week and given a statutory 48 hours in which to lodge an appeal.

are slim.

## **Opec ready** to extend quota deal By David Young **Energy Correspondent**

trust products,

The agreement on oil out-put levels due to expire on October 31, is now likely to be extended until the end of the year with a radical new formula introduced from January 1

The Organisation of Petro-leum Exporting Countries has spent the past two weeks working on the new system under which Kuwait and Saudi Arahia will receive a larger share of the market because they bore the brunt of production cuts over the past three years.

Sheik Yamani, the Saudi Minister, who on Friday said he would oppose any extension of the present agreement, yesterday said his country's position had changed because of firm committments by the other nations.

He expected the oil ministers, who began their meeting again last night, to reach a final agreement on the new Quotas when the meeting is resumed this morning.

The oil price rose from \$10 a barrel to more than \$15 when the present agreement was announced two months ago, and traders expect prices to start firming today although they are sceptical that they will go as high as Opec's target price of \$17 to \$19 a barrel. Arah politics, page 27 | above Opax's 260p cash offer.

The age-old question quis custodief ipsos custodes?, crudely rendered into who will shave the barber?", has a new translation: who will audit the auditors?

It may seem odd, at a time of general deregulation, that the Government appears to be looking for ways of increasing the amount of regulation on auditors. Yet the Department of Trade and Industry, headed by Mr Paul Channon, and the Office of Fair Trading, whose director-general is Sir Gordon Borrie, have both brought out documents in the last two months which could have profound effects on how accountants are regulated and on the services they can offer.

There are no statutory reasons for changing the present arrangements apart from the comparatively minor changes required by the Eighth Directive. And the Department of Trade and Industry's consultative document on the regulation of auditors is precisely that. It merely suggests areas where change may be appropriate, along with some possible solutions Nevertheless, the pro-

fession has not been seduced by the somewhat bland tone of the consultative document and has rightly decided to treat the suggestions as if they do, indeed, have a serious chance of turning into reality. The closing date for com-ments is the end of January but individual member firms are already coming up with their initial responses. As things stand, the audit

function is governed by statute and professional guid-ance. The chartered accountancy bodies are the very embodiment of the principle of self-regulation. They decide what training is needed by auditors, provide the educational facilities, set the examinations, and control admission to membership. Their right to do this depends on their continued recognition by the Secretary of State.

At present, auditing is the only statutorily regulated activity of a range of financial services offered by accoun-

The con-Arguably, the auditor has a sultative document appears competitive advantage in obtaining additional finannot to favour any greater cial services work and this may make it difficult for extension of the regulatory framework to other services those who want to expand such as tax advice and their services in the newly management consultancy deregulated financial markets to break in. Nevertheless, a Being appointed auditor big proportion of consultancy confers duties and privileges. work is awarded to specialist, In reporting on the stewardship of the company, he bas a duty to be independent. He is firms who are not the

auditors. The provision of additional services is seen by some as being a possible source of conflicting in-terests, compromising the auditor's independence. He may somehow be pressurized into somethiog he may not

tered Association of Certified Accountants.

The most controversial proposals concern the indepen-dence of the auditor and the question of whether all accountancy services, as op-posed to auditing alone as at present, should be subject to

regulation. Other issues on which com-ments are invited include the case for allowing accountancy firms to become limited liability companies, the case for soughening up procedures for authorizing individually-ap-proved auditors and the merits of introducing a professional designation com-mon to all qualified anditors.

otherwise have done under the lure of a lucrative management consultancy contract. Or be may offer cutprice auditing - using audit-ing as a loss leader to win more profitable consultancy contracts.

tions, neither of which meets with favour in the profession. One is to prohibit the auditor from supplying other financial services to his audit clients, or at all.

Mr Brian Jenkins, head of audit practice at Coopers & Lybrand, believes: "There are few areas of business that are totally free of conflict of interest. We have always been in the business of Chi-

The nature of auditing is such that auditors must offload conflicts as they arise. They live by the quality of their opinions. They must be well-founded and independent or they are doomed.

Mr Bryan Blackborn, national audit partner at Deloitte Haskins and Sells, expressed his concern: "To justify banning the supply of different services to the same chient, surely it should be demonstrated that the present practices have been harmful to the interests of clients and investors. We do not think this has ever been the case".

The alternative suggestion, to limit all audit appointments to a certain number of years, would, in Mr Blackborn's view, increase audit fees. Coopers & Lybrand, in its

initial response, has decided not to answer the specific questions raised in the document but has attempted to broaden the terms of the debate. "Should we not redefine the scope of the audit to include management ac-counts and the whole basis on

which the company is managed?" asks Mr Jenkins. The present method of reporting by auditors dates back to the 19th century. Modern information systems and the complexity of busi-ness life have made it out-

dated. Calling the annual report's half-a-dozen lines, to the effect that the accounts give a true and fair view, an auditor's "report" is at best an exaggeration. It serves neither the shareholders, the management nor the

directors. If Mr Jenkins is right and the auditing function out of date, then it has been out of date for some time.

If they are to justify their claims for maintaining the status quo, on the grounds that it works perfectly well as it is, they must demonstrate that these issues can be recognized and tackled without having to be prodded into action by the threat of greater government regulation.

Otherwise, the Government

## US NOTEBOOK)

. . ----

## THE TIMES MONDAY OCTOBER 20 1986

BUSINESS AND FINANCE

## Emerging snake hypnotizes the US

#### From Maxwell Newton New York

Mr James Baker, the US Secretary of the Treasury, has lost out to the Japanese, the Germans and the Swiss, who have persistently complained about the American policy, introduced by Mr Beryl Sprinkel in 1981, when he first entered the Treasury, of a "free floating" dollar.

We have now entered into a world of "narrow banded" exchange rates. Since early July, in the case of the yen and the Swiss franc, and since early August, in the case of the mark, these major currencies have been held in a "narrow band" of fluctuation with the dollar

#### New world

The "narrow bands" for the major currencies appear to be: Mark 49-51 US cents; Swiss franc 60-62 cents;
Yen 64-66 cents.

On Thursday, the mark opened at 50.82 hut by the close had been pulled back to 50.73 (December contract). The Swiss opened at 62.20 but by the close was back down to 61.96. The yen opened at 65.03 hut by the close was down to 64.92.

Of the three central banks who are presumably hand in money glove with the Fed - the Japanese are controlling their currency most closely. This is because of the much greater leverage available to the Japanese authorities (in the Bank of Japan and in the Ministry of Finance) in controlling many economic aggregates at once through the "cluh" atmosphere in which major policy issues in Japan are history decided and administered.

A new world of fixed exchange rates is emerging. Many other currencies are tied to the dollar and hence are tied into the emerging "snake".

#### No shrinking

The loser in this will be the US, which is fast losing all policy flexibility. With the exchange rate fixed, with the Fed impotent (following the failure if the "gang of four's" expansionary money policy culminating in the four discount rate cuts this year) and with fiscal policy in anarchy, how is the American economy going to shift off dead centre?

Arab politics slows down **Opec's quota calculations** 

Two-month delay in implementing new agreement

## By David Young

Energy Correspondent After more than two weeks of intensive and intense discussions, the Organization of Petroleum Exporting Countries appears to have given itself another two months to calculate a series of percent-ages, which seemingly could be done in seconds on a pocket calculator.

The fact that it is on the result of these calculations that the price of oil will depend during next year makes it seem absurd that the oil producers appear so indecisive. Opec calculates that its 13 member nations have been losing \$100 million a day between them while the oil price has slumped this year, so why the delay in taking a decision which will send the

cohesively.

price back upwards? The answer is politics and Arah politics at that. While Onec has members from

Indonesia, Latin and South America and Africa, it is also the one forum in the world spotlight where the differing factions in the Arab Gulf are involved, and by necessity have to appear to be acting

The fact that two have been at war for more than six years and have their supporters among the other Arah delegations cannot be allowed to become a big issue. The main issue has to remain oil and Opec now has to marry the science of economics with the art of politics, and it is this

which is taking time. Progress has been made in Geneva and the mere fact that the countries have accepted that a Corporation. radical new output quota system will come into force is one of the most significant moments in Opec's 26-year

In future, the output system should be set at a meeting The kingdom and its neigh-

room and gradually persuaded the other ministers to accept.

Between now and Opec's

next meeting on December 14

the final figures will be cal-culated and in the meantime it

seems that the output quota

system in force for September

and October will be rolled

The adoption of that system sent the world oil price up from just under \$10 a barrel

to just above \$15 and some oil

traders in Geneva were

predicting that the markets

will today start marking the oil

price back up. Opec's aim is still for a price of between \$17 and \$19 by the

end of this year and how they

hope to achieve it will no

doubt be explained this week

by Sheikh Ali Khalifa and by

Opec's president, Mr Rilwanu

Lukman, the Nigerian oil

minister, when they are in

Sheikh Ali Khalifa started

With these in mind, we can turn to the great monetary question of the day, the question which has exercised many a brilliant mind in the past two or three weeks. Is I percentage point, taking bank base rates to 11 per cent, enough? But, before answering this, we need

to set the scene. The statement that no-one can actually tell what monetary policy is, except in retrospect, is one that some, perhaps even the Chancellor, would challenge.

But it is true. Take, for example, last Tuesday's increase in base rates. Interest rates were lifted, Mr Lawson said at the Mansion House, because the growth in narrow money, MO, was accelerating and because the exchange rate was weak. It had nothing to do, he added, with the growth of broad money and credit.

Now, supposing this to be true, the timing of the rate rise looks a little odd. The Bank of England would have picked up the acceleration in MO growth last month quite early, certainly during the month. And the pound was weak enough last month to require substantial intervention and a \$372 million underlying fall in the reserves.

The citing of M0 as one of the triggers for the rate rise was also rather puzzling. It had seemed to be the case that the target range for M0 was 2 to 6 per cent. Now it appears that there are divergence indicators within that target range. Growth of 4.5 per cent in MO was bad enough to persuade the Chancellor that the exchange rate was telling him than something was wrong, but growth of 18.3 per cent was not. Again, monetary policy can only be read in retrospect.

There is much to be said for continuity in policy, and most of all in monetary policy. It would be good if we had it.

A year ago, also at the Mansion House, Mr Lawson said: "If, contrary to our expectations, the rapid growth of broad money were to show up as higher spending one would expect to see early money signals in the growth of MO."

In its June Quarterly Bulletin, the Bank of England cited three factors which would indicate that liquidity, which had built up rapidly as a result of strong broad money growth, was no longer being willingly held. The first was higher pay settlements, which we

There are two things that one should financial institutions and a consequent fall in sterling, which we probably are seeing. And the third was additional consumption by households, which we certainly are seeing.

No.

14

But, despite the balance of the evidence, including his own pet M0 aggregate, the Chancellor could de-clare last Thursday that: "There is every sign that people are holding the increased amounts of broad money quite willingly. And so long as this is so, its growth is not inflationary."

Leaving aside the Governor of the Bank of England's view, also expressed at the Mansion House, that 'liquidity and credit have in fact been growing uncomfortably fast," it is perhaps understandable for the Chancellor to prefer to focus on the growth of narrow money. Other Chancellors have done so.

Had Anthony (now Lord) Barber had the benefit of M0, rather than M1, figures in the early 1970s, they would have shown growth of 12 per cent in 1972 and under 11 per cent in 1973. Worrying, but not enough to cause any major panics. The relatively restrained growth of narrow money was comforting to the authorities in this period. But M3 grew by nearly 30 per cent a year, and its growth certainly was inflationary.

To return to the question: is 1 per cent enough? Enough for what?, is an appropriate, but not particularly helpful answer, so let us take it step by step. Is it enough to stop the exchange rate from failing? It did not on Friday and there is every reason to suppose that it will not in the next few days. But sterling will get to the point when it is clearly overshooting and, on exchange rate grounds alone, there is a case for toughing it out with the markets.

Is it enough to rein back accelerating M0 growth, charitably assuming that Mr Lawson was not speaking. with forked tongue when he mentioned it? Probably yes. A one-point rise in base rates should have the effect of shifting enough growth in non-interest bearing narrow moneyinto interest-bearing broad money as to claw back M0 growth from 4.5 to 4 per cent.

Finally, is one point enough to deliver low inflation in the medium term? Almost certainly not. The difficulty with liquidity is that if yon allow it to build np, it has a habit of leaking out. Mr Lawson is the ministerial equivalent of the 24-hour plumber. He has effected, when he could at last be contacted, a temporary repair. But the chances are that he will have to be called out again.

**David Smith** 

than a day and, with an easily controlled and policed system, Opec hopes that it will once again be in the driving seat when it comes to setting the world oil price. It relinquished that role to the free market last December when it opened the taps and sent production up far in excess of what the industrialized world needed.

By sending the price down to a level which squeezed That decision was taken partly to hit at North Sea revenues, Saudi Arabia sought to administer a short sharp prices and development proslesson to the other member pects in retaliation for what Opec saw as Britain reneging countries. It could weather any price storms because of its great reserves and also be-cause Sheikh Ahmed Zaki Yamani, the astute Saudi oil on an agreement to keep North Sea output at about the 2 million barrel a day mark. minister, had devised a scheme of selling oil to the

#### NOTES

This unaudited statement has been prepared under the same accounting policies used in the statutory accounts for the 12 months ended on 31st March, 1986.

2. Trading profit is stated after charging depreciation on the basis of historical costs.

3. Thames Water is not liable for corporation tax.

4.\* The 12 months figures to 31st March 1987 are forecasts based on expectations in October 1986.

#### STATEMENT BY THE CHAIRMAN, ROY WATTS, C.B.E.

Commenting on the results, Roy Watts, Chairman of Thames Water Authority said "Against a background price rise of only 3 per cent, our continuing efficiency drive both in operational and in capital expenditure terms, has resulted in the first half year's profit target being exceeded. We anticipate that the second half year will also exceed target.

Between September 1985 and September 1986 we repaid £58m of our outstanding loans as well as meeting all capital expenditure from internal funds.

We are actively selling our expertise both at home and abroad to provide future profits for the benefit of our customers."

## Formidable task faces the new chief of BankAmerica

#### From Bailey Morris, Washington

The return of Mr A W Tom" Clausen in the embattled BankAmerica Corporation is by all accounts controversial.

31

Although there was general relief at the departure of Mr Samuel Armacost, former "boy wonder" of the banking world, after five unbulent years, the same cannot be said of Mr Clausen's reappointment as chief executive officer, a post he held from 1970 to 1981 when he quadrupled

Despite an impressive record which led to his appointment as head of the World Bank, Mr Clausen is now criticized for his accounting techniques and an overrapid expansion which got the bank into trouble as early as 1980.

Claire Giannini Huffman, daughter of the bank's fnunder, is a strong critic of the Clausen reappointment. Still active at 81, she does not mince words when assessing the management shuffle which led to Mr Armacost's, wellfinanced but hasty departure.

"To bring Clausen back is a joke. It is absolutely incredible," she said, beingstrongly of the opinion that the bank should accept a \$2.8 billion (£2 billinn) takeover offer from First Interstate Bank Corporation.

In her view both chief executives "riddled" the bank. alloted: \$100 causing a haemorrhage of bad loans that culminated in record losses of \$640 million during the second quarter. On Friday, BankAmerica

reported a much improved third quarter performance showing a loss of \$23 million. It is more generally agreed that a combination of marginal loans and an unforseen

period of disinflation which battered the energy and farm Armacost at a regularly sched-uled board meeting nn Octoindustries caused ber 6. Mr Armacost and two

assets of about \$143 billion. closer look.

Last week, even as Mr Clausen prepared to fight off First Interstate which is reportedly ready to raise its offer to between \$21 and \$23 a share, New York's Citicorp indicated it too was interested in buying all or part of BankAmerica to gain a long sought base in the lucrative California market. Security Pacific Corporation has been mentioned also as a possible suitor.

assets sales and cost-cutting" that his predecessor was unable to accomplish.

Aiding him in this effort will be Mr Thomas Cooper, the After the success of the trip single-minded President of the Bank of America division, who was brought in under Mr Armacost last August to slash costs. He did it by eliminating jobs at a rate of more than .000 a mooth. BankAmerica employees

Clausen's reappointment, said the new chief executive faces

formidable, analysis estimate that BankAmerica would be worth much more if broken up into pieces and merged into The Unlisted Securities another company.

This is precisely what First Interstate intends in its \$18 a share takeover offer. In reading the fine print, it becomes sonal Equity Plan. clear that First Interstate would attempt to sell-off an clude USM stocks because the estimated \$2.5 billion in assets shares were too high-risk had before merging the two organizations into a banking provoked complaints that this was both arbitrary and not conglomerate operating in more than 12 states with total even based on fact.

PEPs managed by the big institutions are unlikely to invest heavily in the USM, but Under these conditions, assuming BankAmerica's loan the lack of an option to do so portfolio does not deteriorate may have discouraged comdramatically, it could become an unparalleled prize to a panies from chosing the secondary market as a means suitor willing to accept the risks. This explains why othof flotation. Many small companies are ers are begioning to take a well aware that the "new

world" will require a different and more active approach to communications with investors and shareholders. One group of USM companies which at an early stage rec-ognized the need to take the initiative was the club of United States companies known as the London Connection. The first meeting of the London Connection was held at Boston, Massi, in June

when a group of fund man-agers, analysis and jobbers flew nut for a week to visit the Mr Clausen said he was reappointed to "accelerate the high-tech research and production facilities.

the club intends to meet biannually, alternating between London and the US. The next meeting will be in London next month and, given the easier access, the attendance is expected to be substantially higher. The club has expanded

many who opposed Mr from the original five members - CVD, Infrared, Pacer

The growth in the use of Morket received a welcome communications and marketing services in the financial boost when the Treasury announced that USM stocks will sector over the past few years was clearly reflected last week now be included in the Perin the results of the Moorgate An carlier proposal to ex-Group.

This company was formed six years ago to advise insurance companies and other financial groups on the design of promotional literature and overall marketing strategy. It has grown rapidly on the back of the increased awareness by financial institutions of the need for more professional and effective commumcations.

Pretex profits in the ine financial year were just below £750,000, and the ligures announced this week showed a 30 per cent increase to £324,000 in the first six months of this year. Turnover increased by 58 per cent to £10.3 million.

This excellent progr however, came with a sting in the tail. The company's in tion, when it came to the USM in May. 1985. was to rais money to fund a mirror operation in the US.

To do this as rapidly as the company originally boped proved difficult, and investor uncase on this score will be reinforced by news of the departure of the joint manual ing director who ran this operation. The release of his 25 per cent shareholding hosdepressed the shares to 1060. It is another instance of how

the market is paying increasing attention to the manage-ment quality of people businesses rather than to the carnings per share growth.

# And finally, the complete picture.

THE TIMES MONDAY OCTOBER 20 1986

If you've ever puzzled over the name U-BiX, we'd like to put you in the picture.

For years, we've been known as makers of the most reliable copiers in the business, but you probably don't know about our new range of office equipment.

Fax machines, word processors, personal; computers, and electronic filing are now as much a part of our business as photocopiers.

That's why we decided it was high time wechanged our name.

So from October 1st, we'll be known as: Konica Business Machines.

Now you might be wondering what Konica (more famous for their cameras) have to do with U-BiX, and office equipment.

Well, quite simply, both Konica and U-BiX share the same parents. A company called Konishiroku.

After years of working alongside each other, contributing and swapping ideas, it seemed silly not to use the same corporate identity.

After all, both sides have made significant breakthroughs in their similar fields.

Konica for instance, developed and produced the world's first 'through-the-lens' automatic exposure SLR camera. They also produce their own high quality colour film.

And together with our background in consistently excellent copiers, we are about to launch a revolutionary new full colour copier.

Of course this is only one part of our extensive range of office equipment, which includes high quality products right across the board.

Understandably, we're quite proud of our new identity and to celebrate, for a limited period, we're giving away a free camera with every new photocopier or fax machine.

So to complete the picture, just fill in the coupon below and we'll send you the new Konica

Business Machines brochure and a free 35mm, Konica colour

Catriona Baker owns Cloudberry Clothes in Edinburgh. She had wanted to work in fashion on leaving school, hut like so maoy bright students, was steered away from art college towards university – to read philosophy and history. Io her final year she reverted to her original idea and was planning to min grant idea, and was planning to gain experi-ence by working for someone else, when she saw the Stirling graduate enterprise programme advertised.

Selection was stiff. The first interview with a panel from the local husiness community was difficult; the final one in Edioburgh more so. "I ended up shouting at one point, and was surprised to get through."

What did the programme give her? "Positive encouragement," she says. "For the first time I met people who did oot say 'go and get an ordinary job'. When a difficulty arose, I was helped to find another way out. I gradually saw the future growing in front of me. The two crucial things were the help with my business plan and in raising finance."

Catriona began with an overdraft for 50 per cent of her capital and a family loan for the remaioder. She has been able to lease her own shop, but has had to start by producing a smaller range than planned. And, most importantly has already had to learn to modify some of her original ideas according to the demands of the market. Her selling point is that she designs her own clothes by employing outworkers, but makes up some herself, and is able to offer an individual service to customers. She is oow io a position to expand her ranges and has already paid off the family loan.

All graduates start in a small way, usually saving their capital for essentials and economising in other ways. Andrew Inglesion hopes to employ between 10 and 20 people over the next five years, but when he set up his road haulage traction service, Dockspeed, he operated it as a limited company and employed nobody else. Based at his parents' home, he bought a truck, arranged to rent a parking space well away from residential areas, and apart from some help from his mother who agreed to take phone calls in his absence, worked very long hours. He did everything himself: administration, publicity and driving - sleeping in the

truck at times. A small part of his working capital was spent on headed stationery: everything else went towards getting his truck on the road Canvassing for business was done partly by phone and largely in person. Andrew aimed to capitalize on the fact that large companies have been closing

down their transport departments in favour of subcontracting, and set out to provide a service pulling trailers between European destinations; at first persuad-ing established haulage firms to sub-contract work to him. Last year he said: "I seriously underestimated the problem of raising finance and at one point thought that I would never get a truck on

the road." Now he is able to say: "I never expected to get a second truck on the road so quickly." Julia Staniland is still storing cases of wine "all over the house," but hopes sooo to have her own premises. She is importing wines from Bordeaux to sell in her home area of Bedale, North York-

#### All GEP candidates must be. prepared for teething trouble

shire. Unlike Andrew and Catriona who. had ideas about their future careers before university, Julia did not consider either the wine business or self-employ-ment uotil her third year at Durham. Here in the course of studying French and Russian, the course of studying French and Russian, she spent some time at Bordeaux university and met some local wine growers.

Cranfield helped her enormously, she says, not only by teaching her everything she knows about running a business, but allowing her to make contact with poteotial clients when she provided the wines for the end of course dinner attended by industrial sponsors. One of her most valuable aspects has been the after-care and support from accountancy firm Arthur Andersen. Julia used her market research period

to visit every restaurant and wine bar in the area, and has found other clients through word of mouth after supplying wines for local functions. She is at present experimenting with wine tasting

setbacks. Julia's problem has been the now to higher education institutions.

ooreliability of other businesses. Twice she has been let down by transporters who failed to deliver her wines even though she had bought them io France and arranged shipment well in advance. She has had to rush to London and huy bottles from several sources in order to meet her obligations.

All three are grateful for the skills the Graduate Enterprise Programme taught them, and despite teething troubles and initial difficulties are determined to carry on and to expand. But what of the Programme selectors? What do they expect from applicants?

Professor Burns of Cranfield is quite elear. "Personality," he says. "We can work oo the idea - help to improve that, but oot on the person. Successful entrepreneurs have three things in common: drive, commitment and a rugged personality. That is the vital combination occded to go ont and make things happen." "Although we are clearly looking for a good business idea too" he adds

Last year the Cranfield programme had 36 places. The current programme which commenced on September 5 has and advise them whether to proceed with their applications were oot too sure of the standard required.

Paul Burns was hoping for an alloca-tion of 100 places for the automn 1987 programme. Last week the MSC oot only agreed to fund that number, but also suggested a Business Enterprise Programme for a further hundred. This will be a different, slightly shorter scheme, aimed at graduates whose ideas are more appropriate for self-employment than for the Graduate Enterprise Programme, designed to encourage graduates ul-timately to employ others. Cranfield has agreed to take the scheme on board, but will now be hoping to attract 400 applications from students due to graduate in 1987 to fill both programmes.

All GEP graduates have to expect Publicity material is being sent out

## **UNIVERSITY APPOINTMENTS**

31

## UNIVERSITY OF LONDON

## **Price Waterhouse Chair of International Business Taxation Tenable at Queen Mary College**

The Senate invites applications for the above Chair. The whole issue was unfortu-nately coloured by the unhappy phrase "lock-out". It gave the impression of a hard-hearted ninetcenth-centry. employer. But it merely meant that an employer was taking steps to enforce what he believed to be his legitimate rights to persuade the workforce to comply with what he believed to be their medicine of mattern conditions of contract.

Mr livine had pointed out that there was ample authority to the effect that there could be industrial action where there was no breach of contract, and that the same must apply to a

lock-out The appeal tribunal rejected the argument that the breach of contract test was a proper test. It was not necessary to incorporate it to give efficacy to paragraph 24 of Schedule 13.

It was an unnecessary burden Mr irvine succeeded in his argument that what had oc-curred on February 25 was a lock-out and not industrial ac-tion, Mr Alsbrook's position became irrelevant. Relevant employees in rela-tion to a lock-out were defined differently, from relevant employees in relation to a strike

contrast test were wrong the contrast test were wrong the contrast test were wrong the evidence as to what took place on February 25 could lead to would be enabled to bring their claims if there had been would be enabled to bring their any other conclusion than that claims if there had been a lock- of a lock-ont. out whereas a more limited The employees appeal would

claims if there had been a lock-out whereas a more limited number only would be eligible if there had been a strike or industrial action. Paragraph 24 of Schedule 13 defined both lock-out and strike. The industrial tribunal had adopted the test: "Were the employers. in breach of Gassman & Matthews, Chelsea.

**Evidence of indecent intention** 

Before Lord Justice Ralph Gibson, Mr Justice Hirst and Mr Justice Otton

Evidence of indecent inten-tion did not have to be excluded as irrelevant to a charge under section 14(1) of the Sexual Offences Act 1956 even though positive proof of indecent inten-tion was not required by the section which was silent about the necessary mental element in the offence of indecent assault

Lord Justice Ralph Gibson so stated when giving reserved reasons in the Court of Appeal but denied it was indecent. The buildenied it was indecent. The judge rejected an invitation to exclude the statement about "bottock fetish" on the ground that, beiog a secret uncommunicated modive, it could not make indecent an assault which by reference to the reasons in the Court of Appeal for dismissing an appeal by Robert Christopher Court. aged 27, from conviction at Caernar-fon Crown Court (Mr Justice Mars-Jones and a jury) of indecent assault on a girl aged 12. He was put on probation for three was swith a condition of three years with a condition of 12 months' psychiatric treat-The judge, rightly, directed the jury that it was concessary for the prosecution to prove that

Mr Trevor Halbert, assigned by the Registrar of Criminal the girl knew or thought the assault on her to be indecent. Appeals, for the appellant; Mr Robin Spencer for the Crown. LORD JUSTICE GIBSON

said that the appellant, a shop being held to be indecent and assistant in a gift shop, asked a the jury held them to be so. girl who visited the shop with her brother whether she would

It was open to the prosecution to call evidence available of an Ict him spank her. She said "No" and walked away but later he seized her arm, pulled her across his knees and struck her 12 times outside her shorts on . her buttocks. He stopped when-her brother appeared. admitted secret moove which actuated the accused to commit the particular offence charged.

which interviewed by police the appellant admitted spanking the girl and, when asked why, said: "I doo't know - buttock fetish". It was the first time he had ever done it.
 At trial be admitted

other issue to the case. Their Lordships did not ac-cept the Crown's submission that the existence of a secret secual motive was always admissible as a make-weight on the issue of objective indecency. The jury should be directed that the secret motive could not time could not make indecent an The buy should be directed that assault which by reference to the the secret motive could oot turn overt circumstances was oot circumstances into indecency if indecent. The judge, rightly, directed

There was evidence of circamstances of indecency and the verdict was not unsafe or unsatisfactory.

assault on her to be indecent. -It sufficient if the circuma-stances were capable in law of Colwyn Bay.

## **Fitzgerald drops** out and Gibson drops in for Irish

#### By George Ace

Mike Gibson the Younger dans the green jersey of Ireland for the first time since 1981 for the game against Romania in Dublin on Saturday week. Cicran Fitzgerald is dropped and the captaincy goes to Donal Lenihan. Phil Orr will win his for a front row forward. And Michael Kiernan is in the centre despite the fact that he has not played competitively for the past four weeks owing to a leg

national nopearance against Wales in 1981 when he came on as a replacement for Donal Spring. Injuries to Spillane and Morrow almost certainly opened the door to Gibson's unexpected return and if the years have not dimmed his talents he is fully

Gibson, an extremely talented No. 8 when he played in all four championship games in 1979, had bis career cut short through

injuries. He made his last ioter-

of the Irish selectors were whally of the Irish selectors were whally capahls of justifying his predictable for the npening international of the season; as predictable, that is as any outcome of an Irish rugby

geraid, took neer for the first time when Fitzgerald was in-jured early in the game against Wales in Dublin in 1984 and was retained for the remaining selection meeting can be. Gibson, onw playing two matches that season against England and Scotland. He mer-its his recall, although the decision to include Fitzgerald forLondon Irish, was not in the 30-man panel announced 10 days ago; but according to the chairman of selectors, Eddie Cnleman, be "has been watched". That is more than can be said in the case of Kiernan, whose selection breaks an un-written law that if a player among the replacements sug-gests that, in the minds of the selectors at least, there an element of doubt.

All Crement In Outpot Reclamb (Balymona), B Mai University), M Klemen (D Crossen (Instoniens); P Deen M Bradley (Cork Constitution) Wesley), H kerbison (Bechve F Strument (I andrefuma). written law that if a player misses his clab match through injury the week before the selectors meet he is not consid-Klernen (Dolphi ns); P Deen (St M

Whe England squad leave on October 28 for four days in Portugal, but Hannaford, the physical terms, is a huge one. On Saturday he was magnificent, showiog pace, flair, clusiveness and, perhaps above all, initia-tive. Judged oo natural talent, he is certainly worthy of 'comparison with the likes of Rory Underwood and Mike Harrison third scrum half in the squad, may not necessarily be replaced (David Hands writes).

David Egerton, the Bath Nn. 8, another member of the national squad, was given an injection on Friday to help alleviate a cracked vertebra and reacted poorly and did not play on Sanuday, although he hopes to have his first game of the seasoo during the coming week.

## **Back play the lingering** memory as smoke subsides in war game

**RUGBY UNION** 

By David Hands Rugby Correspondent

1986

s right

Abar

Some games remain sporting conjests, some become wars. There was a bit of both at Sudbury on Saturday but the redeeming element was the back play of both sides. It was that sense of adventure which lingers after the crude unpleasantness of some of the forward exchanges, Wasps achieving only their fifth win against Cardiff and their first since 1961 by two goals, a try and three penalty goals to a goal, a try and two penalties.

It was possibly the strongest combination that Cardiff have fielded this season, injury and unavailability having hit them budly. But though the individ-ual confidence remains, the collective confidence has yet to be developed and Cardiff's fixture list allows little room for error.

Nor do Wasps permit lib-erties: there is a mental hard-ness about them which made encouraging watching for two England selectors, Martin Green and Tony Jorden. The front rows locked horns from the beginning and Daniel Neyrat, the French referee, never got to grips with the consequent problems.

To be fair to him, if the forwards are so disposed there is little any referee can do save award a string of penalties (which he did) or send someone off. Two players did leave the field, but for injuries: Rose, the Wasps No. 8, went Wasps led 21-4 at the off midway through the first interval, having had first use

half with concussion after a of the elements. Andrew kick on the head (he will be absent for the next three weeks) and thereafter there was sporadic violence, of 16 which the main victim was Phillips, the Cardiff captain, who was punched io the face and cut about the mouth and

Wasps' loss was the more severe, since they had to bring on a hooker to play back row, but their forwards showed enormous commitment. Probyn and Pinnegar had outstanding games in the tight and loose and behind them Pratt and Andrew were the more influential halves.

Pratt is coming on by leaps and bounds at scrum half and Andrew's increased maturity and physical commitment to the game is obvious. He and Lozowski combined splen-didly into the gusting, awk-ward wind in the second half. playing short balls between them which gave their weakened back row the chance to support properly.

When they moved it wide the thrust of Pellow and Stringer brought the best from the Cardiff defence, in which Roberts had a significant game as well as supporting everything io sight when his team attacked. Stringer, it should be said, played soundly in defence, 100; he caught all the high balls put up by John, though it was difficult not to

wonder whether the retired Gareth Davies would not have harnessed the wind for Cardiff to better effect. Still, John is the newcomer making his way in a team who are out of sorts.

kicked three penalties when Cardiff collapsed the scrum and Lozowski made a sweet break, arcing through midfield so that Stringer could dispatch the powerful Bailey to the line. Within two minutes Bailey scored a second try when, with every Cardiff back committed

to attack, he intercepted a pass and ran in from 55 metres. Cardiff's response, assisted by Crothers keeping the ball alive, came when Hadley beat

Smith on the outside and chipped to the corner: He overran the ball but Ring did not. John could not convert but when he kicked two second-balf penalties it seemed as though Cardiff would nibble their way back.

A glorious try by Wasps ensured they did not. Stringer ran the ball from his own 22metre line and found support from Probyn, Bonner, the enthusiastic Bartholomew and Pratt. With Cardiff's defence drawn to one side of the field, Andrew directed a diagonal kick to Smith, who scored.

Cardiff, despite their growing lineout dominance, could only work Crothers over for a try from a tapped penalty and count their blessings when a desperate hand prevented Bailev scoring once more

"He's io tremendons shape," said Geoff Lawson, Guy Harwood's brother-in-law. "Dancing Brave will gallop again on Tuesday and Thursday and will also have a couple of work-outs io Santa Anita before the big day."

A lust for California gold, 1986 style, seems to be consuming all the top Eurofinished first and third respectively in Saturday's Dubai Champion Stakes.

Neither man has yet de-cided whether to take on Dancing Brave in the \$2 million mile-and-a-half event on turf or go for the \$3 million Breeders' Cup Classic, which is run over 10 furlongs on dirt. "We'll only go for the grass race if the ground is soft," said Biancone. Previously placed in six

consecutive group one races, Triptych was predictably going to put her act together one and if he keeps well we'll go for day. And on Saturday, in the the Carleton F Burke Handi-

## **Bien Dorado for treble**

race of his life, the Jalio Mariner colt produced a fine effort to divide Picen and Russian Relation. He should confirm that form with the latter in the Abington Ben Hanbury, who has an excellent success rate with his runners north of the border, can launch another successful Scottish raid today when I expect BIEN DORADO and MEVAGISSEY to win the last two races at Hamilton Park. Only last Tuesday at Ayr, Fourth Tudor and Bien Dorado provided the Newmarket trainer with a double. Now the latter is napped to compiler an Maiden Stakes.

Maiden Stakes. VALENTINE SONG, sevenih to Gold Fee on her debut at Newmarket earlier this month, can fulfil that promise by bening Lady's Mantie in the opening Murdostown Muiden Stakes. However, the latter's trainer, John Dunlop, should not leave without a winner as ANGEL CITY has outstanding claims in the Thankerton Auction Stakes. The Araudel trainer should also be on the mark at Leicester with DOMINO FIRE (4.15) and BRONZEWING (4.45). The latter's debut third behind Sciniture and Chorizo at Goodwood appeared a sound effort at the time but looks even better now as that pair have the latter is napped to complete an October treble in the Symington

Stan, NR; Le Sor. Kelso 2,15 1, Northern River (9-4 fav); 2, Sr Jest (20-1), 3, Katy Ounck (11-4), 7 ran. 2,45 1, Vallent Wood (9-1); 2, Clorisharagh (4-5 fav); 3, Parmine (5-4), 3

run off his old mark. Strictly on a point of handicapping, Bien Dorado should not confirm Ayr form with Silly Boy, who finished third and is now 71b better off for a two-length defeat. However, the half-length winning margin did not reflect Bien Dorado's superiority over his field on that occain partnership with Boh McCreery.

track," he said. Sonie Lady, however, after an impressive Saturday workout, remains oo target for the Breeders' Cup Mile. A de-cision about Green Desert will be taken today. Sure Blade, after drifting in the market from 9-4 to 100-30, failed to act in the soft ground and came in eighth. "He's

Why the chairman of Tottenham had second thoughts about joining the team that have yet to win their spurs

The one-man management committee

## By Stuart Jones Football Correspondent

Irving Scholar, the chairman of Tottenham Hotspur, yesterday ex-plained to The Times why he declined to stand for election to the Football League's management committee. He had been the outstanding favourite to fill the vacancy left by John Smith, Luton Town's secretary, who resigned 10 days ago.

"Last May, when I was nomi-nated for the new committee, I thought that it might bring in a new dawn," he said. "I thought that it would have something to offer. Now that I have seen the way that it has gelled over the last five months, I feel that the timing is not right."

Scholar almost joined the re-formed team. In the May election he finished fourth behind Philip Carter, the League president, Smith and Ken Bates. Before the subsequent play-off against Bert McGee he was promised 16 votes by his first division colleagues. Six changed allegiance and he lost 12-10. Smith's position was far from

clear, anyway. Cynics on Merseyside have suggested that the voters, who received a list containing merely the name J. Smith, assumed that the candidate was the chairman of Liverpool and of the Sports Council rather than the representative from Luton.

Their view is supported by the number of congratulations that were mistakenly sent to a bemused Smith at Anfield. He was not among the choices. Luton's Smith, agreeably surprised by his success, soon discovered that he was "out of tune" with the other members of the committee.

#### The policy men who are without power

It includes four directors from the first division, three from the second (Ron Noades, of Crystal Palace, Bill Fox, of Blackburn Rovers, and Ian Stott, of Oldham Athletic) and one from the third and fourth (Jack

Dunnett, of Notis County). Collectively, they make policies but have no power. Individually,

they range from the eccentric (Bates's idea of controlling hooligans was to construct an electric fence around the perimeter at Stamford Bridge) to being so moderate as to be weak. It is a curious mixture that is spiced with strong political overtones.

Scholar feels that "there are more politicians in football than there are in the House of Commons." Carter, for instance, happens to be the chairman of the Conservative Party in Liverpool. He, for one, would have welcomed the support of Scholar, who believes that he would have been in the minority.

Once the votes have been taken on a contentious proposal, such as the banning of away supporters at Kenilworth Road, the members of the committee must either accept the decision, even if privately they disagree with it, or resign, as in Smith's case. A public voice of discontent leads to unacceptable discord.

Rather than being gagged, Scholar would clearly prefer to be free to speak. Rather than being bound by internal wranglings, he would prefer 10 spend his time (committee meetings take up two days a week on average) on the topics that he thinks are of greater importance within his own club.

He points out that Watford, who opened their new stand at Vicarage Road on Saturday, work outside the committee and have set an example for the rest of the country. He is aiming to bring a similarly warm and amicable atmosphere back to the terraces of White Hart Lane.

## A game that should be a family affair

"I have a cutting on the wall of my office," he said. "I look at the beadline every day. It says 'Football is a family affair', which of course it should be. We are trying to make it that at Tottenham, to encourage the youngsters and to cut out the foulmouthed chants.

The players went into the family enclosure abont an hour before the kick-off yesterday, for example, and signed autographs. That sort of thing seems to be working. Our

membership scheme, which is the biggest in the country, has gone up by 1,000 to 18,000 within the last week. "Just look at the competition that

the game faces every Saturday. We have to make a special effort to attract spectators and to make them feel at home. The authorities seem to have forgotten about them and it Luton Town ... galls me that the positive elements of football do not seem to be promoted".

Scholar is convinced that first division sides should each be allowed two substitutes, as oo the Continent. He is also attempting to lead the way back into Europe. Hamburg have accepted his invitation to play Tottenham on November 4 in a match that he trusts will be as friendly off the pitch as on it. His decision not to stand, though understandahle, is regrettable. He would have been a steadying influence on a committee that threatens to run wild. Smith's successor is likely to be either Maurice Rowarth, of Nottingham Forest, or even David Dean, of Arsenal. It is as well to reflect that it does indeed have no

Theories

but no

It is a new twist in the temperamental behaviour of football managers when a win-ning one refuses to face the press after a game. But since winning has seldom been more important than style or quality at Old Trafford this victory could be seen as another defeat for Manchester United.

In the park

they would

have gone

unnoticed

By Clive White

Manchester United..

Nothing seems to go right these days for Ron Atkinson, their manager. Having spent the first six weeks of the season nist six weeks of the scason trying to explain away their misadventures in competition he now finds himself, rather less successfully, trying to explain away those in training. He committed the whole of his committed the whole of his programme notes on Saturday to defending the club, and principally himself, against allegations that morale and relationships within the team were bad after the "training accident" which left Olsen with a severe eye injury after a clash with Moses.

a severe eye injury after a clash with Moses. Relationships between the Manchester press and Atkinson have certainly deteriorated to the point where last Friday be walked out on them at a press conference and then on Sat-urday they walked out on him after walked out on him

after waiting more than an hour for him to emerge from the

changing rooms. A more poignant walk-out was that by sections of the 39,000 crowd several minutes before the finish. Whether it was a gesture of displeasure or merchu to avoid the nith one merely to avoid the rush one cannot be sure. But unquestionably there was little to encourage them to stay other than to witness a deserved equalizer by

Luton. Not even Old Trafford's grand setting could lift this game out of the ordinary. Had it been beld in a local park along with half a dozen other games I dare say it would have passed un-noticed. And that is about the most damning thing one can say about Manchester United. The United crowd know

entertainment when they see it and were not fooled by United's early goal which owed itself to an involuntary contribution from one of their old boys. Grimes muffed a back pass and Davenport seized on the error to draw the goalkeeper before giving Stapleton the opportunity to over-indulge himself by lashing the ball into the feebly guarded

The worshipping thousands. as ever, were desperate to applaud somebody or some-thing and the ego of Barnes feeding on early success, at least went some of the way to meeting that demand. That United should have to depend so heavily upon such a fitful character made nonsense of their championship aspiration.

## West Ham expose the chinks as Norwich are held by Goddard

#### By David Powell

Scholar will not be gagged

Norwich City's stay at the top of the first division may have lasted only a week, but as their best crowd for 19 months dispersed on Saturday few of the near 23,000 would have wagered against them returning there this season. It was one of football's quirks that, after a game so rich in quality, both teams should find themselves lower down the table than they were before kick-off. Norwich dropped from first to second, and West Ham from fourth to fifth but, as the London club's manager, John Lyall, said: "That was the way we would like to see the game played," Coming from one

who bases his football philosophy on panache, it was praise indeed, and Norwich were as deserving of it as Lyall's own

practice By Stuart Jones Tottenham Hotspur .... Sheffield Wednesday ... 1 The prospect of a home fixture against Coventry City would not usually pierce the daydreams of a manager, particularly if he is in charge of Tottenham Hotspur, Yet David Pleat is already wondering aloud about the game at White Hart Lane on November 15. His audible misgivings are not wrapped around the oppo-sition. He is concerned about the armentions of his awn of the preparations of his own side. There will not be any. He knows that much from his experiences last week when eight of his

power.

players were away on inter-national duty. Absenteeism is likely to be as rife next month. As he finds his way around his new club, Pleat admits that he needs time to complete his designs and to put theory into practice on the training pitch. There were bursts of inspiration, as though Tottenham-had adjusted to the problem, but Pleat admitted that "we didn't maintain our standards for any length of time". When they did,

Hodge was equal to them. One save, from Waddle, was de-scribed justifiably by Wilkinson as "international class". Wednesday's manager mut-tered that he has "a lot of players" whose talents are under-rated. He did not mention them by name but they had already spoken eloquently enough for themselves.

Marwood overshadowed the performance of Waddle on the same flank, Shelton and Megson

## missed by Forest By Vince Wright

Nottingham Forest ...... 1 Queen's Park Rangers... 0

Noningham Forest have re-gained the first division leadership but the pressure at the top may be telling if their last three League matches are any guide.

A formight ago Manchester United had the better of an absorbing 1-1 draw at the City Ground: the following week Forest were beaten 3-1 by Leicester City and on Saturday they were fortunate 10 defeal Oreen's Park Rangers, who made Brian Clough's splendid young team work hard for their victory.

Rangers, who do not usually unavel well, provided unexpect-edly stiff opposition, their fluent football and boundless energy ceping Forest fully stretched. The steady afternoon rain seemed to put extra zip into Rangers' play, whereas Forest's enthusiasm appeared to be

dampened. The game was a tale of two easy chances - one missed by John Byrne, of Rangers, the other converted by Nigel Clough of Forest, Had Byrne not hifted bis shot over the bar ofter 39 minutes Rangers would prob-ably have won. Instead, at the start of the second half. Clough, held on. six yards out, collected a re-bound off James from a Mills comer and instantly cracked the

By Dennis Shaw

Coventry City... Wimbledon.....

Highfield Road's excursion into Subbath football would never clear the golf courses and pubs, though mercifully it had one redeeming feature. This was Coventry's well justified win-ning goal accepted with rare panache by Bennett, injecting a flash of entertainment into the drudgery. The move to prise open a

wimbledon defence concerned exclusively with playing the off-side game tool, so hour to arrive. Covering had tried many ways to get through a five-man defence supplemented by two midfield players but with a nauve lack of success.

The wighing some proved imphably simple. A long punt out of defence, a head flick by Regist and suddenly Bennett was clear. Happily he possessed both the control and the composure to draw Beasant forward before finding his target. There were claims that the Coventry forwardwas off-side but, ironi-cally, it was one of the few occasions in 90 minutes when draw.

he was not. In truth, the linesman's flag want op at lettet two dozen times the denote a Coventry forward caught like a fly in the trap. "We should have had more sense

their own training on Friday, was keenly felt by Forest. Although Pearce and Bowyer had goals dis-allowed for offside, the Forest **By Nicholas Harling** Then there was one. Defeats machine was not running for the two unbeaten second division clubs. Portsmouth and smoothly and they continued to

struggle, despite Clough's break-through. Campbell came off a Plymouth Argyle, leaves only one team yet to sample the experience of defeat in the League this season, but they, Exeter City, are doubtless a lot clear second best to Lee in the battle for midfield supremacy and the flying winger, Carr, when he was not tying himself in knots, was being cleverly con-tained by Dawes, the Rangers' more popular with pools punt-ers than the paying public. Colin Appleton's side were watched by a crowd of 2,461 at icft back

eff back. Birlies hit the post but, before that, Carr had squandered a golden opportuniy of killing off Rangers. He almost paid dearly. At the other end Segers saved brilliantly in quick succession from Chivers and Bannister. Hereford, where their sixth successive away draw enabled them to share the points for the eighth time in 11 fourth division games. It is not necessarily the stuff of which promotion-achieving teams are made of,

Forest were frequently res-cued by the sound handling of their reserve goalkeeper and he however, since Northampton, the leaders, are eight points better off Portsmouth went down bewas given good support by Des Walker, who returned to form after his costly lapses against fore the biggest second division crowd of the season at Leeds, for Leicester the previous week. whom Sheridan scored a controversial first from the pen-Rangers, who again found no

**Border and Jones thwart** 

## India's spin bowlers From Richard Streeton, Bombay

Indian board official joined one stroke erased Australia's Allan Border and Dean Jones batted through the final three hours 20 minutes together to them and there was a long discussion before the umpires reluctantly walked off and an thwan the Indian spinners in the third Test match here yesannouncement was made that terday. Australia, who were 172 runs behind on the first innings. the match had been halted.

There was some tense cricket early on when Shastri dismissed Marsh and Boon in 10 balls. Marsh was bowled hehind his legs as he pushed forward; Boon cleared their deficit shortly be-fore tea and the match finished on a subdued note. on a subdued note. The culprit was a pitch which, contrary to what was forecast by the groundsman, became tamer as the game progressed. The ball always turned but only slowly. was caught hehind as be tried to square cut. Australia were mo-meotarily io danger. All the hard work and team uoity forged oo the tour would have gone for nought had Australia subsided at this point. They would have returned to meet England with their coolidence smached to smithereens Australia's opening pair were the only batsmen to be dismissed on the final two days. At a time when Indian administrators were desperately aox-ious for the traditional charisma of Test matches to be restored, it smashed to smithereens.

Border, that seasoned battler, was a disappointing finish to a series which left the teams level. and Jones, standard-bearer for the new generation, made sure the possible crisis was avoided. None of the expectation raised Both batsmen, and Jones in particular, had moments of

partnership of 160 between Broad and Slack was dwarfed by the 235 Gatting and Athey added in 140 minutes for the fourth wicket. Uotil he mislaid his timing against the medium pacers, Broad had played faultlessly, but Slack, outscored for an hour. went oo to display the greater range of stroke.

Athey played immaculately at his own pace, booking well, and in no way disconcerted at being overshadowed, first by Gatting and theo. for the fical seven overs. Botham, who smoothly smote 50 off 25 deliveries.

Indoor success: Becker after his victory over Lendl

## endl overpowered

Sydney (Reuter) - Boris Becker, the Wimbledon cham-pion, dropped the first set but came back to overpower Ivan Lendl 3-6, 7-6, 6-2, 6-0 in the final of the Australian indoor tennis championship bere The West German, aged 18,

bluoted Lendl's firepower with his tifle-like serve and powerful ground strokes to close out the match in two hours 27 minutes. Becker bumiliated Lendl in the final set, breaking the top seed and defending champion in the first, third and fifth games to race to a 5-0 lead, For Becker. the second seed, it was the fourth grand prix tournament success of the year.

Becker has now beaten Lendl on three of the four occasions they have met this year. His other wins were in the final of the Chicago event in March and at Wimbledon in July. The pair's head-to-head record oow stands at 5-3 io favour of Lendl.

Becker needed four match points to secure the win as Lendl tried valiantly to stay to the match. What was significant about yesterday's victory was

is what Becker believes stands between him and the top spot. "Ivan seems to reach a final almost every week." he said "Playing the good players brings out the best io me, but I still sometimes have trouble with the oot-so-good players."

The Mets, who hit a meagre 0.189 in the National League championship series against the Lendl has won four grand prix. tournaments this year against Becker's four, Lendl said be did not feel non-Grand Slam events bad much importance ashe was No.1. "It's oot a disaster to lose Houston Astros, managed only four hits off Red Sox starter, Bruce Hurst, and reliever, Cal-vio Schiraldi, who pitched the nioth inning. to Boris. It's just another day, another match," he said after only his fifth loss of the year. The next Grand Slam tour-nameni is the Australian Open

The only ruo in the game was scored in the seventh inning. Jim Rice led off by drawing a at Kooyong io Melbourne in January next year.

Jum Rice led off by drawing a base on balls, and moved up on Darling's second wild pitch of the game. One ont later, catcher Rich Gedman, hit a routine ground ball to Teufel, who failed to get his glove down as the ball to get his glove down as the ball scooled through bis legs into right field. Rice got bome well ahead of Darryl Strawberry's bish throw and Gedman cruised RESULTS: Men's singles: Semi-final: 1 Landi (C2) bt P Cash (Aus), 7-5, 8-2; B Becter (WG) bt G Layandecter (US), 8-4, 6-4, Final: Becter bt Land, 3-6, 7-6, 8-2, 6-0, Men's doubles: Becter and J Fitzgerald (Aus) bt B Dremett and K Warwick (Aus), 6-4, 7-6.

Defending Croydon's Duke McKenzie is to defend his European flyweight title against court surface that particularly Giampiero Piona, of Italy. suits Lendl's game. "Lendl is still No. 1, but I'm getting closer and closer," Becker said after his The deadline for purse offers to the European Boxing Union is October 27. emphatic triumph. Consistency

## RUGBY LEAGUE Leeds humbled by Australians' merciless machine

By Keith Macklin

The merciless Australians continued their awe-inspiring preparation for next Saturday's first international at Old Trafford with a comprehensive 40-0 humiliation of Leeds. If the Kangaroos had wanted to exert themselves they might well have tooned 60.

Even allowing for the quality of the Australians, Leeds were a great disappointment, and rarely competed. They made the fatal mistake of allowing the

fatal misrake of allowing the free-flowing tourists to run with the ball, and the Australians responded by scoring eight tries. Two of them came from O'Connor, the wing, who also kicked four goals. The case with which the Australians found gaps in the home defence was underlined when Sterling, the half-back, made an optning for Dowling, the front row forward, to trot through a wide gap at his leisure. Australia fielded what was virtually their full international squad for next Saturday. Tovirtually their full international squad for next Saturday. To-morrow night they send their second string to play Cumbria at Barrow, and such is the strength in depth of these 1986 tourists that another comfortable vic-

tory seems assured. At St Helens, Wigan won their eighteenth Lancashire Cup io 32 finals after an uncertain start against Oldham, the under-

BASEBALL

goes to

dogs. Oldham scored first when Clark, the buge Australian for-ward, made a gap for Bridge, his countryman to the centre. Hobbs kicked the goal and for a while Oldham played with con-fidence. Theo a disputed penalty goal from Gill was quickly followed by a break by Bell, the New Zealand centre, which sent io Ford for a try. Gill kicked the goal and at half-time Wigan ked 8-6. In the second half Wigan

goal and at half-time Wigan led 8-6. In the second half Wigan showed something like their normal form as Oldham ran out of steam, heart and confidence. Ford and Roberts were outstanding as Edwards ran in for two tries, Lydon scored a try and dropped a goal, and Gill completed five goals. Io yesterday's champronship matches, Warrington main-tained their pursuit of St Hel-ens, the top club who beat Salfard on Friday, by coming from behind against Watefield Trinity. At half-time Trinity led 12-2, but Andy Gregory came on-as substitute to inspire the Warington attack, and they eventually won 28-18. Widaes. another championsip chasing side also came from behind, turning an 18-4 deficit at Leigh into a 20-18 victory with a late try from Gilbert. Io the second division, Enscorn Highfield had a fine 22-4 win over Sheffield Eagles.

## Inflating reputations in the Bath bubbles

#### By Rex Bellamy, Tennis Correspondent

But for two Bath bubbles, yesterday's finals of the British Home Stores national parks championships would not have finished. A month ago, four courts were housed under two synthetic bubbles in Royal Victhird edition of, what has twened out to be, the sports promoter's version of a best-seller. Well, teamis players have to start somewhere and some remark-ably good ones have started in the parks. Remember Roger Taylor? toria Park, Bath, and con-

synthetic bubbles in Royal Vic-toria Park, Bath, and con-sequently, the last two days of this nation-wide tournament – one winner came from Glasgow, another from Exeter – were tracked sawaj from the prevailing wind and raiz. The environment, mind yon, was unusual. Trees hemming in the transparent bubbles looked like pictures on the walls. There was little room for spectators while mapires had to scramble to improvised perches on top of the airtight, revolving, doors. All this was a bizarre climat to an event that originally attracted some 4.000 conspetitors – twice as many as the more dis-tingnished, recently concluded, Britisb national championships. The parks event was insurgo-rated inst year when 16 local anthorities took part. This year the oumber rose to 28, of which 17 were represented in saturday's semi-finals of the seven events, and it is envisaged that about 40 will be selling the

## Mandlikova pulls out

#### From a Special Correspondent, Stuttgart

Martina Navratilova won the Porsche grand prix tournament yesterday with a 6-2, 6-3 victory Diver the second seed, Hana Mandlikova. It was a straight-forward success for Miss Navratilova against the sup-posedly injured Czechoslo-vakian player, who has pulled put of the Pretty Polly classic at Brighton because of a stomach Porsche grand prix tournament yesterday with a 6-2, 6-3 victory over the second seed, Hana Mandlikova. It was a straightforward success for Miss Navratilova against the sup-posedly injured Czechoslo-vakian player, who has pulled out of the Pretty Polly classic at Brighton because of a stomach

strain. Miss Mandlikova's game did - and that is exactly what she wanted to avoid. "I'd rather not seem to suffer, however, as she admitted she had been outplayed. "I fell pressure from pick up some computer points winning a couple of matches in qualifying than draw a seed in first serve, she attacks your first serve, she attacks your second serve. So I tried to serve too well and hit some double faults." she said. Miss Mandlikova now plaos to take a few dow off to ellow the first round," she said las

Kelly aims to walk tall

By George Ace

Larne in Northern Ireland, is the vastly more experienced of the two, having won 10 and drawn two of his 12 contests, including a tenth-round stop-page, despite a broken finger, of another: Scot, Bolby, McDermott, who took only three rounds to halt Kelly in

Dave McAuley puts ao un-beaten sequence oo the line against Joe Kelly io Glasgow's Albany Hall tonight with the British flyweight title as the prize. McAuley, aged 25, from Larne in Northern Ireland, is the vastly more experienced of the two, having won 10 and drawn two of his 12 contests, including a tenth-round stop-page, despite a broken finger, of another Scot, Bohby three rounds to halt Kelly in

the records suggest

## OVERSEAS RACING

## Authaal to seek classic double at Longchamp

#### From Our Irish Racing Correspondent, Dublin

Authaal, all-the-way winner of the Irish St Leger eight days ago, will attempt a classic dou-ble next Sunday when he goes for the French equivalent, the Prix Royal Oak, at Longchamp. David O'Brien, his trainer, confirmed the plan at Naas on Saturday after Warsaw Pact, the unst ervensive winner of the day, had survived a stewards' inquiry to take the Woodlands Race. the ultimate destination for Nordica, who woo the following race, the Carna Stakes. Nordica was sent over by Alec

Nordica was sent over by Alec Stewart to run at the Phoeoix Park nine. days ago and after failing to get into the money there, was left in Ireland for the Naas race. It disproved a profit-able decision as Nordica earned almost £9,000. Golden Dome started favourist describt to more the Nace. Sheikh Mohammed's Danzig colt, who cost \$350,000, may have been a little lucky to hold on to the race as he had failed to keep a straight course.

The victory of Stirabout in the Newbridge Handicap, Hurdle provided the middle leg of a treble for Dermot Weld and also marked the 100th winner of the season for the Curragh trainer. favourite, despite top weight, in the Red Sunset Birdcatcher

the Red Sunset Birdcatcher Nursery but, after showing plenty of speed, weakened up the hill to finish a well-beaten third behind Native Sal, whose win provided the young trainer, Robbie Connolly, with his most valuable success this season. The first of the Weld winners was Risky Game in the Colm McEvoy Two-year-old Fillies' Race. She is a beautifully bred youngster by Troy out of Sweet

**Antheus foils British** 

Antheus (Gary Moore) proved too good for the British trio of Dihistan, St Hilarion and Tommy Way when running away with the group one Gran Premio del Jockey-Club at San Siro, Milan yesterday. The Criquette Head-trained colt now retires to stud in France Dihistan, who finished third, did best of the invaders but was never a danger to Antheus once be had surren-dered the lead 300 yards out. St Hilarion stayed oo well to take fourth with Tommy Way having to settle for a share of fill place Mummy's Favourite, a stable Premio dei Jockey-Club at San Siro, Milan yesterday. The Criquette Hesd-trained colt now retires to stud in France. Dihistan, who finished-third, did best of the invaders but was never a danger to Antheus once be had surren-dered the lead 300 yards out. St Hilaring staved on well to take

to settle for a share of fifth place. Mummy's Favourite, a stable companion of Tommy Way, ran well to take third bettind Saint Samba and Only Star in the after noon. Pat Eddery, who rode Bold And Beaufild for Gavin Pritchard-Gordon, was well The Dunlop camp finally had something to shout about when to settle for a share of fifth place. Mashkour had every chance. Szeve Cauthen electing to go to the front after two furlongs. But he could only run oo at one pace ner. In the Prix du Petite Couvert, Sharp Romance and Filleor predictably proved no match for Parioli. Baiser Vole and Pre-

## Those golden, olden words of English, y'all

en de envirence d'altre en

• The Story of English - Pio-neers! (BBC 2, 3.5pm) looks at the USA's best contribution to the English language: slang, some of it drawn from earlier phases of the country's development. The gold miners and trappers of the frontier gave us "pan out", "strike it rich", "working like a beaver"; and the opening up of the railways led to "letting off steam", "back tracking" and "making the grade". The other source of lively, collo-quial American is of course the uial American is, of course, the European immigrants' native tongues, German, Italian and, above all, the language of "chutzpay" and humour, Yiddish. Robert MacNeil ernlaite how the Robert MacNeil explains how the American child came to influence, indeed to overwhelm, the English DRICHL • There is such a glut of wildlife programmes these days that I hesitate to pick out any one of.

CHOICE them for recommendatioo. particularly when it's a repeat. But if you were ever to watch only one natural history series. I'm sure that Charles Darwin himself would recommend Life On Earth (BBC 1, 7.35pm). It illustrates so vividly both the beauty and the unimaginable variety of wildlife (picture getting the million-odd species so far discovered on to Noah's Ark, two by two), and the awesome timescale of creation: our puny 2 million years set against, for example, the snail's 440 million. Tonight, David Attenborough reaches birds, "The Lords of the Air".

When today's sportsmen claim that they are criticized for being "too honest", I tend to substitute the adjectives, "vain, childish and self-indulgent". Which, of course,

7.35pm), talking to young peole from all over Britain. The question of drug taking, not surprisingly, is uppermost.

.21.

• Any new sit-com featuring the comedic talents of Penelope Keith and Geoffrey Palmer should be worth sampling. Tonight sees the debut of Executive Stress (ITV, 8pm), written by George Layton (of Don't Wait Up fame), in which a publisher's wife, and former publisher's editor berself, decides to go back to work now that her five children are grown up.

• On its first showing last year, Coming Next (C4, 8.30pm) was an indispensible fixture of my late-night Saturday viewing for the sake of "WestEnders", its outra-geous spoof soap set io a Fulham club patronized by Sloane Rang-

has nothing whatsoever to do with the fact that Ian Botham is Open to Question tonight (BBC 2, a clever pastiche of the programme, a clever pastiche of the pop music shows of the 1960s - remember Ready Steady Go?

> Radio highlights, in brief, include The Crossing Keeper's House (Radio 4, 8,15pm), Dawn Lowe-Walson's play about the forced iotimacy of strangers, a man and woman (Richard Pasco and Jennie Stoller) marconed in a snow-bound East Anglian cottage for days on cod.

> • And there is the much-lauded Elly Ameling Recital (Radio 3, 8pm) recorded at this year's Bath Festival. In the first half, the Dutch soprano is accompanied by Rudolf Jensen in Schubert lieder, and after the interval she gives us soogs by French and Spanish composers.

Anne Campbell Dixon

## Geoffrey Palmer (left), Harry Ditson and Penelope Keith (ITV 8pm)

hy Of

- Ir

emerged victorious over England at ending with an unavailing Willesden yesterdayto win the World Cup for the first time in their colourful career. They were bronze medal winners at Bombay four years ago.

The jobilant Australians, would probably want to forget those last seven minutes of the match when England, with the crowd spurring them on, kept pushing up as much as they could and throwing every-thing in attack. The 2-0 lead which Australia had established had suddenly been reduced and they were struggling to hold their advantage.

How relieved the Australians were was reflected in the words of their coach, Richard Aggiss, who said: "With seven mioutes to go, we were trying to close up the game. But it didn't work, and in the end England were running all over

Englaod were disappinted at not having achieved the ultimate, which was to win the World Cup, but there was no denying the Australians their triumph. They were the most excitiog side, the eoterprising, and the most entertaining. They had the energy and drive to brush most of their opponents aside. By half time when Australia

were leading 2-0 they probably thought as many others did that the game was over, not bargaining for a stirriog challenge hy England who came to vibrant life, albeit a little too late. Richard Dodds, the captain, said: "Australia had won most of their earlier games hy He despatched it cleanly to-

half-time, and when they went wards goal only to see Davies two ahead against us we knew clear from the line. The it would be most difficult to Australians tended to panic, recover. And so it was after Australia

another short corner.

wasting.

and their captain, Bell was given the vellow temporary suspension card for a rough charge on Grimley. While he had done more of the attacking in the first period. Within was off he saw bis centrefive minutes, Taylor in goal bad saved from Mitton, and forward Walsh seize a chance and put a shot over the top. from Bestall at a short corner, Withio a minute Sherwani the scramble that followed returned the compliment. appeal by Charlesworth for

Then the flames of interest were kindled anew as Barber's England did not have a player of the quality of Charlesworth who not only free hit through the middle of the field went straight to the Australian goalkeeper who lost sight of the ball and Potter did his share of the attacking, but also kept popping up at the nipped in to score amid a most unexpected places to pull deafening roar. The Austrahis colleagues out of trouble. He was awarded the prize for lian defence faltered as England kept pressing forward. the player of the tournament, and Taylor for the best

With three mioutes to go, there was a short corner for England, and agaio Barber was sharpening bis sword, but Except for Sherwani on the left flank, nooe of the England the Australian centre-half, Birforwards many any inroads into Australian territory bemingham, who had a splendid game, was on him in a flash fore the interval, the intiative and managed to deflect the remaining with Australia who went ahead io the fifth minute shot. The ensuing scramble led to another short corner when Walsh scored from a and with the crowd still cheering. Barber raised bis pass by Hawgood. The lead was increased in the 24th stick as the hit from the line minute wheo Bestali coowas perfectly stopped. Alas, verted a short corner. But for the ball was cast adrift. the timely interception by Barber, Hawgood might have

In a couple of minutes it was all over and the Austraput Australia three up at the lians bugged one another in interval, an advantage which celebration. Aggiss joyfully said: "We thought we had a good team in Los Angeles, but they were desparately seeking. Beginoing the second half with a substitution. Shaw, this is a better balanced one comiog in for Leman, England with a couple of younger made their first spirited sally players in it. Uofortunately for with Kerly going through the middle but putting his final pass beyond Sherwani's reach. everyone, we hope to be even better in a couple of years' time." He was referring, of Australia were then awarded a course, to the 1988 Olympic sbort corner, hut the umpire Games cancelled it out for time-

ENGLAND: I Taylor; O Faultone, P Barber, J Potter, R Dodds (capt), M Grimley, S Batchelor (sub: K Bhaura), R Leman (sub: J Shaw), S Kerly, N Hughes, I Sherwani, A great roar rent the air as England were awarded their AUSTRALIA: N Snowden; J Bestall, C Davies, O Bell (capt), W Birningham, T King, G Maton (sub: D Evans), C Batch, T Walsh, R Charlesworth, N Hawgood (sub: P Maseiturst). first short corner, particularly as Barber began to positioo himself for the shot in the Umpires: S Dec (Spain) and A Renaud (France). ninth minute of this period.

#### By David Miller

THE SERVICO

SPORT

For the second time in 24 hours, England staged a rousing late recovery, but io vain. Australia, who have been scoring almost as freely as Steve Davis all fortnight, were emphatically the better team to yesterday's final of the sixth World Cup, the first to be played in Europe in 13 years. England might complain about some

of the opposition's tough tactics - their captain, Bell, was briefly sent off io the second half - but there was no complaining about their level of skill. They had scored well over four goals a game, so England may consider that theirs was an achievement in being

Though they will be disappointed, following the success of their rousing semi-final recovery from 2-1 down of Saturday against West Germany, the Olympic silver medal winners, England have marvellously cootributed to what, m its way, has been a minor British sporting triumph at Willesden.

Some 14 hours of exposure by BBC television, highlighted by Sportsnight and shown live by Grandstand, has raised public consciousness. The event should persuade Mr Richard Tracey. the Minister for Sport, who was present yesterday, together with the Sports Council and local authorities, that hockey is exciting, disciplined and skilful and is worth the investment of a hundred artificial pitches.

Tracey had a message of goodwill in the tournement programme. What hockey needs is the goodwill of financial grants in inner-city areas such as Willesden: the doubling of the Sports Council's grant from the Government. The Sports Council contributed a mere £40,000 to the Cup hudget of three quarters of a million. When I asked David Whittaker after the semi-final how, in an amateur sport, England could develop any further beyond their present limited level of training and coaching, the answer was simple; what has happened the past fortnight will inspire a new generation of young players, and that will raise standards. Two days after the derisory rejection

by the International Olympic Committee of Birmingham's Olympic bid, Juan Antonio Samaranch, the presideot, came to suburban north-west London to present yesterday's trophy, and saw for himself the kind of situation which for so long has epitomized British sport: enormous voluntary effort doing its utmost to compensate for basic lack of funds.

Britain contributed to the world much of all that is best in amateur sport, yet, last Friday, Birmingham paid the price of a century of amateurish administratioo in too many sports. It is somehow characteristic that Birmingham, creating admirable new facilities, was unfancied by the IOC, yet 40 years ago it was impecunious Britain, masters of improvization, which volunteered to stage the Olympics when no one else had the money or energy after

John Willmott, the honorary stadium

director at Willesden, and the temporary limited company organizing the cup, have put on a memorable tour-nament with the help of 250 volunteers. io addition to the sponsorship of NEC Business Systems and Sciko.

The spirit of Dad's Army is both the soul and the shortcoming of so much of British sport. Almost every facility at Willesden, other than the pitch and small main stand, has been temporarily crected and will now disappear. England's hockey quality will live on.

Mrs Thatcher offered a welcome to the world in Birmingham's video film presented to the IOC in Lausanne, but the sporting facilities of Britain in the main fall wretchedly short of the competence of our competitors, as Dodds, Kerly and the rest have just demonstrated. It is symptomatic that Southgate, one of our best bockey clubs. has no artificial surface on which the best hockey is now played.

There is so much about hockey, as televisioo has revealed to a huge new public, to be recommended. Illegal physical intimidation is punished, the regulations are properly upheld, the game is only occasionally dangerous, the only equipment required is a ball and a stick. The administration on the pitch is a lesson to soccer. The twoumpire system, for so long stubbornly refused as a consideration by soccer, works admirably and permits players to get away with little.

## The day English wonders ceased

Simon Barnes

England were rampont. The shots raised in on the Australian goal: over the bar by an inch: into the goalic clotted off the line once, and then again: missing the past by a cont of paint. At the other cost, crouched like a parady of a . wichethreper behind his man-strous pads, Ian Taylor, the England goalkeeper watched as had took fixed lise if ion an inexorable pattern. He had given his lot, and must have known then it was not enough: not quilt.

He had already concelled two goals, and that was too many. The first had come from a whistling open play more, the second from a short corner he had conceded biased. He he had convolution intervent the has saved hundreds of short corners in the past few days, performing mitacles of cour-age and anticipation: this time the shot deflected downwards. off his body into the goal. The miracle man of popular imagination had not per-formed to expectation. For once he had not done the impossible.

Taylor is the first English hockey player to became a media folk bero. He plays in what must be the most horrible position in any sport, and is best in the world at doing it. His lunatic courage, and the His lunatic courage, and the startlingly effective use of that courage, have captured everybody's imagination: In Los Angeles, for Gt Britain in the Olympic Games, and again over the just fortnight for England at Willesden.

## Watching the final prize slip away

, Ì

1

One felt for all the English team, at the end: they have given us all so much and such surprising pleasure: they have introduced as all to a new and stunning game; they have got the cheers of the nation behind them; and they just. But one feels especially for Taylor: performing his miracles as a mutter of dally routine throughout the last couple of weeks, and finally, hopelessly, watching the final price slip away.

25 feet, from where he boled, gave Langer an eagle three at the seventh compared to Ballesteros's four. Theo Ballesteros took three putts on the next green. Langer, seizing his chance, carefully studied a curling putt of 16 feet on the ninth green and to his joy, the ball disappeared for a two.

Ballesteros, now with fragile, one-shot, lead, gave himself a cushion again when he reached the long 12th with two woods for a birdie. Langer, bowever, once again reduced his deficit to one with a birdie at the 14th. He had a clear chance to level at the 17th hut missed from seven feet for a hirdie. Even so, he confidently holed from a similar length on the last green to ensure a play-off.

Des Smyth, of ireland, stormed out of the pack to take third place with a score of 66 for a total of 275. He seemed to have little chance of doing so until he chipped in from 25 yards for an unlikely eagle two at the 14th. He salvaged a par from out of a hunker at the 15th, then single putted each of the last three greens to finish with three birdies

Tony Myler, the Great Brit-ain stand-off, has withdrawn his transfer request and pledged his future to Widnes keeper: he must convert himself into a flying horizontal barrier and allow the hell to strike him again and again. rugby league club.

with sickening force. Taylor Doncaster duo bought his protective gear in

Los Angeles when he was there for the Olympics: he koows it is still inadequate. It Doncaster rugby league club have signed Tony Kemp, a under-21 international centre is mostly the stuff that ice hockey goalies use; they only play bead on, while Taylor is likely to stop shots with any given part of his anatomy. The and Telmadge Sharrock, a second row forward from Waitara, a top New Zealand club.

bits at the sides and back are horribly vulnerable. Yet the flying barrier does not do a lot of flinching LeMond faith

Greg LeMond, the first American winner of the Tour de France in July, has renewed his contract in Paris with his Strikes like bolt La Vie Claire cycling team, until the end of 1988. LeMond of lightning said he would only consider changing teams if an American corporation offered to sponsor a top-ranking Ameri-

Trust post

He wears a chest protector that the Metropolitan Police. use as riot gear. He was given a plastic face guard that was guaranteed to stand up to the rigors of his position: he tried out at home and it shattered the first time a half hit it. A Richard Faulkner, the secretary, has been appointed hockey ball comes at you like a bolt of lightning. The skill needed to stop it is as immense chairman of the Football Trust to succeed Sir Norman Chester who died last month.

as the courage. "I hate if more than anything when people say after a shot bas deflected off you. "the goalie was so locky," Taylor said. "Sometimes I'm 'lucky' dozens of times in a match". In the semi-final on Saturday he couldn't have been luckier; he made six steening stops in, quite literally, two minutes play. He came from his goal to perform a flying scissor kick to clear. He was everywhere. But by the end of the final yesterday, there was no more tack left.

But Taylor had done more than anyone else to bring about this new wave of interest in the game of hockey. In Los Angeles and in Willesden, his non-stop stream of miracles has given Great Britain and England the edge, and kept a legion of new converts to the game on the edge of their scats. Who was that masked man? That was English hockey's lone superstar. The bast 35 minutes of the

World Cop were all England: Taylor, for once, eginvolved. It was all out of his reach by that time. One sensed his huge desire to do something: in the last second he rushed from his this second ne rashes from an goal is take a 16 yard hit himself. Nothing came of it. English bockey's first star, the man who has performed a thousand miraches is a for-night for his team, was just one miracle short when the fort-Bight ended on the spot
